Corporate Profile

Kingsway Financial Services Inc. is one of the largest truck insurers and non-standard automobile insurers in North America.

We have a proven track record of profitability with a focus on building operating excellence. Our primary business is trucking insurance and the insuring of automobile risks for drivers who do not meet the criteria for coverage by standard automobile insurers. We also operate in commercial automobile, property, motorcycle, standard automobile and other niche markets where limited competition and an emphasis on underwriting profit provide an opportunity for consistent and above-average returns.

Kingsway Financial Services Inc.'s shares are listed on the Toronto Stock Exchange and the New York Stock Exchange, under the trade symbol "KFS". Kingsway employs approximately 2,440 people in Canada and the United States. The Company is headquartered in Mississauga, Ontario, Canada.

Our Strategic Vision

Kingsway's strategic vision is to be recognized as a North American leader in non-standard auto, trucking, taxi and motorcycle insurance markets and deliver consistent earnings and book value per share growth and a return on equity of 15% or more.

We will strive to achieve this by developing:

- Distinctive underwriting capabilities in target specialty markets
- An extensive network of independent agents focused on specialty markets
- Rigorous industry leading program management capabilities
- Strong claims operations tailored to local markets
- Shared corporate support functions
- Outstanding management

Note: All amounts in U.S. dollars unless otherwise stated.

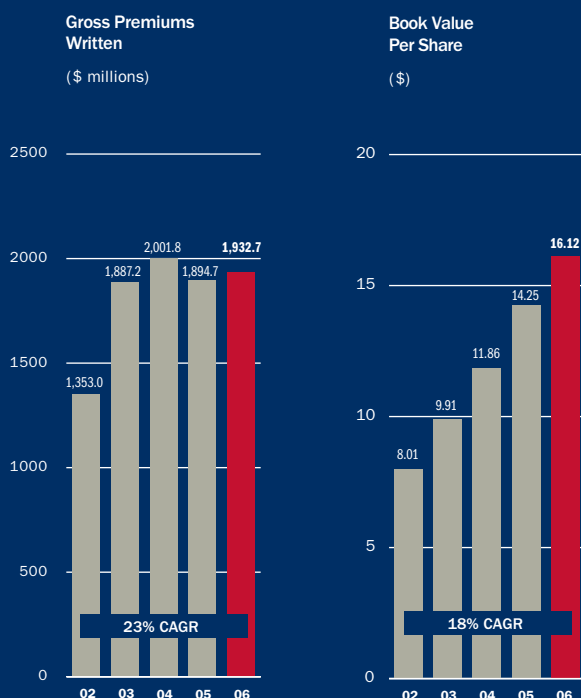

Operating Highlights

2006

- Increased quarterly dividend by 20% to 7.5 cents (Canadian) per share in the fourth quarter of 2006
- Entered into a new \$175 million unsecured credit facility which matures in June 2009
- Recorded net income of \$123.3 million and diluted earnings per share of \$2.17
- Return on equity of 14.5%
- Recorded underwriting profit of \$21.3 million
- Achieved a combined ratio of 98.8%

2007

- Entered into an agreement to acquire, pending regulatory approval, Mendota Insurance Company
- Completed move to new corporate Head Office building

Financial Highlights

Years ended December 31 (in thousands of dollars, except per share amounts)

		2006	2005

Operating Strategy

Kingsway's strong growth since going public in December 1995 is a direct result of a disciplined operating strategy, which incorporates the following principles:

- Focus on good risks within specialty markets where limited competition allows for a good spread of risk and above average returns.
- Emphasize positive underwriting margins, conservative investment policies and low combined ratios to achieve above average earnings.
- Refuse to knowingly sacrifice underwriting profitability to increase volumes.
- Terminate or re-price unprofitable business quickly.
- Selectively pursue acquisitions.

Accomplishments

- **Return on Equity (ROE)** averaging 15.3% over the past five years.
- **Average Combined Ratio** of 99.0% for the last five years.
- **Net Premiums Earned** have grown by a compound annual growth rate of 26% over the last five years.
- **Net Income** has grown at a compound annual growth rate of 34% over the last five years.
- **Book Value Per Share** has grown by a compound annual growth rate of 18% over the last five years.

We provide trucking coverage for liability, accident benefits, physical damage, cargo and comprehensive general liability under a package program throughout Canada and the United States.

Non-standard automobile insurance covers drivers who do not qualify for standard automobile insurance coverage because of their payment history, driving record, place of residence, age, vehicle type or other factors. Such drivers typically represent higher than normal risks and usually pay higher insurance rates for comparable coverage. We are the leading provider of non-standard automobile insurance in Canada and have a prominent position in several U.S. markets in which we currently operate, such as Illinois and Florida. We also provide standard automobile insurance as well as insurance for commercial and public vehicles, including taxis.

We also provide motorcycle insurance, specialized commercial and personal property coverages and other specialty coverages, such as customs, bail and surety bonds. For the year ended December 31, 2006, we derived 33% of our gross premiums written from trucking insurance, 26% from non-standard auto, 13% from commercial and personal property coverages, 14% from commercial automobile, 6% from standard automobile, 3% from motorcycle and 5% from other specialty lines. During the year ended December 31, 2006, we generated 69% of our gross premiums written from the United States and 31% from Canada.

Kingsway Financial is the holding company for all of our subsidiaries and Kingsway America is the holding company for all of our U.S. operating subsidiaries. We operate our business through our insurance subsidiaries which include Kingsway General Insurance Company, York Fire & Casualty Insurance Company, and Jevco Insurance Company in Canada and Universal Casualty Company, Southern United Fire Insurance Company, American Service Insurance Company, Inc., Lincoln General Insurance Company, U.S. Security Insurance Company, American Country Insurance Company, Zephyr Insurance Company, Inc. and Avalon Risk Management, Inc. in the United States. We also have wholly owned reinsurance subsidiaries domiciled in Bermuda and Barbados.

In early 2007, we entered into an agreement to acquire, pending regulatory approval, Mendota Insurance Company and its subsidiary companies. Mendota is a dedicated non-standard insurance provider and currently writes business in 20 states through a network of approximately 6,000 independent agency locations.

Our return on equity averaged 15.3% for the five fiscal years from 2002 to 2006, and for the year ended December 31, 2006, was 14.5% compared to 18.4% in 2005. During the year ended December 31, 2006, shareholders' equity increased 12% to \$901.0 million, and as of December 31, 2006, we had total assets of \$4.05

billion. Our book value per share increased by 13% to \$16.12 in 2006 and has increased at a compound annual growth rate of 18% for the five year period to the end of 2006.

Our Industry

The property and casualty insurance industry is highly competitive and fragmented. However, we generally seek to identify and operate in specialty markets which present opportunities for us to compete effectively due to the narrow scope or limited size of the market or the specialty nature of the coverage or risk. These specialty markets may be defined by geographic area, type of insurance or other factors. We focus on specialty lines of automobile, property and casualty insurance where we believe competition is more limited. We emphasize underwriting profit and will not knowingly underwrite risks at rates which we believe are unprofitable in order to increase our premium volume. We believe that by executing this strategy we will be able to deliver returns that will exceed the average in our industry over a long period of time.

* Sources - Canadian: 2002 - 2005 - IAO, The Quarterly Report, 3rd Quarter, 2006 2006 - Office of the Superintendent of Financial Institutions Canada, Financial Data - Property and Casualty Insurance Companies

[†] Source - U.S.: 2002 - 2006 - A.M. Best, Special Report, February, 2007

We use the claims ratio, the expense ratio and the combined ratio as important measures of our performance. The claims ratio is derived by dividing the amount of net claims incurred by net premiums earned. The expense ratio is derived by dividing the sum of commissions and premium taxes and general and administrative expenses by net premiums earned. The combined ratio is the sum of the claims ratio and the expense ratio. A combined ratio below 100% demonstrates underwriting profit whereas a combined ratio over 100% demonstrates an underwriting loss. We believe that consistently delivering an underwriting profit is the true measure of performance of the core business of a property and casualty insurance

company. We have reported an underwriting profit in 14 years out of 17 since the Company's first full year of operations in 1990 and in four of the last five years. Management's incentive compensation is directly linked to our combined ratio and our return on equity objectives.

In recent years, the North American property and casualty insurance market, including the trucking and non-standard automobile markets, has been less price competitive than in the late 1990's. Many insurers significantly reduced premium rates in the late 1990's due to higher investment returns and an over-capitalization of the industry which subsequently led to poor underwriting results in 2001 and 2002, investment impairments and an erosion of capital. As a result, premium rates began to rise and the industry posted improved underwriting results for 2003 and 2004. However, in 2005 the industry began to soften and this continued into 2006 as the growth in capital in the industry exceeded the growth in premium revenues.

The softening market described in the paragraph above followed the very strong industry results in 2003 and 2004. Following this very profitable period, certain automobile markets experienced increased competition and pressure from governments to reduce premium rates in 2005. 2005 was also a year in which there was significant storm activity in the southern United States leading to a substantial loss of capital by reinsurers. As a result, in late 2005 and 2006 reinsurance rates increased significantly and reinsurers were more selective in their willingness to provide coverage, particularly in those regions which were impacted by these storms.

As in 2005, in 2006 insurance markets have experienced increased competition due to improved profitability and greater capitalization, forcing premium rates down. Also, in the early part of 2006, interest rates increased slightly in Canada and the United States but remained unchanged for the remainder of the year. Storm activity in 2006 was significantly less than in 2004 and 2005, resulting in improved profitability for reinsurers. However, reinsurance costs remain high as the shortage of reinsurance capital and rating agency requirements for increased capital to maintain ratings continues. As a result of these trends, we expect that 2007, like 2006 and 2005, will be a year of good profitability, slow premium growth and high reinsurance costs for insurance companies both in the United States and Canada.

We believe insurance companies which have traditionally relied extensively on reinsurance capacity to support their premium levels are finding this environment particularly challenging. We believe that the combination of these and other factors will lead to a modest deterioration in underwriting results for the property and casualty industry in 2007 which will be partially offset by increased investment income.

Corporate Strategy

Our strategy is to specialize in areas of insurance where we have developed expertise such as trucking, non-standard automobile, motorcycle and taxis. We will then bring this expertise, underwriting discipline and knowledge to a broad range of geographic markets so our risks are well diversified.

Our strategy is to build long-term shareholder value and is characterized by the following principles:

- **Distinctive underwriting capabilities in target specialty markets.**

We manage our business with a strict focus on underwriting profit rather than on premium growth or market share and have demonstrated willingness to increase pricing or reduce or increase premium volumes based on market conditions. Over the five year period ended December 31, 2006, our combined ratio averaged 99.0% and for the year ended December 31, 2006 was 98.8%.

We seek to identify market segments where we believe competition is more limited, presenting the potential for above average underwriting results. We operate through a network of regionally based operating subsidiaries. Our decentralized operating structure allows us to target specialized markets and products based on our underwriting expertise and knowledge of local market conditions.

We rely on our detailed understanding of our regional markets to take advantage of favourable conditions or trends. We look for opportunities to expand our specialty focus into selected regional markets and to increase the distribution of our core products in existing territories. We may also look for opportunities to acquire books of business or other companies which are in line with our specialty focus.

- **An extensive network of independent agents and program managers focused on specialty markets.**

We are committed to our distribution network of independent agents, program managers and brokers.

We continually strive to provide the highest level of service to our agents, program managers and brokers and to build relationships at the local level in the markets in which we operate. We communicate with our network through a variety of channels and we look for opportunities to increase efficiency and further reduce our operating costs, including through the use of technology and automation. We also look for opportunities to expand our distribution relationships and enhance product mix.

- **Rigorous industry leading program management capabilities.**

Our program management begins with a thorough due diligence review of agents' operations and understanding of their historical results. This review is performed by a team of individuals with extensive underwriting, actuarial and claims management expertise.

We maintain strict control over programs by limiting the claims authority granted to agents and structuring the agents agreements so that we have all pricing and reinsurance authority. Our program managers have the opportunity to significantly increase their compensation through commission incentives which are strictly tied to underwriting profit on their program.

Each program manager is subject to regular and vigorous audits to ensure disciplined underwriting and claims processes are in place and being followed in accordance with the agreement.

- **Strong claims operations tailored to local markets.**

We seek to protect our business through diligent claims management. Our claims are managed by experienced personnel located in our regional operating subsidiaries and by selected program managers. We maintain a culture of rigorously investigating claims, promptly paying legitimate claims, preventing fraud and litigating claims as necessary before final settlement.

- **Shared corporate support function**

Our corporate structure helps to meet varied local conditions under a cohesive set of policies and procedures designed to provide underwriting discipline, consistency and control. We believe we can derive efficiencies and cost savings by sharing corporate support functions such as investment management, information systems development, purchasing of reinsurance, procurement and accommodation.

- **Outstanding management**

Each of our eleven operating subsidiaries is led by an experienced executive team with expertise in their chosen niche lines of business and extensive knowledge of their local markets. The average industry experience of the president of each subsidiary exceeds twenty years.

The operating subsidiaries are supported and guided by an executive management team at Kingsway Financial. The individuals on this team average more than 24 years of industry experience and are led by Bill Star, our President and Chief Executive Officer, who has over fifty years of industry experience.

Corporate Structure

Through our wholly owned subsidiaries in Canada and the United States, we are licensed to write a broad range of property and casualty insurance in all Canadian provinces and territories and in all states and the District of Columbia in the United States. We distribute our products through independent agents, program managers, and brokers.

We conduct operations through our subsidiaries to, among other things:

- maintain discrete brand identities; and
- develop expertise and organizational cultures that best serve the individual markets in which we operate.

We believe that the markets for our insurance products differ greatly by community because regulations, legal decisions, government interference, traffic, law enforcement, cultural attitudes, insurance agents, medical services and auto repair services vary greatly by jurisdiction and by community.

Revenues

Revenues reflected in our consolidated financial statements are derived from insurance premiums earned, investment income and net realized investment gains. Our total revenue in 2006 was \$1.92 billion, unchanged from 2005 and an increase of 2% over the \$1.87 billion in 2004.

Premium Income

We compete on the basis of numerous factors such as distribution strength, pricing, agency and broker relationships, service, reputation and financial strength. We are one of the largest truck insurers and non-standard automobile insurers in North America based on A.M. Best data which we have compiled.

In Canada, where we are the largest insurer of non-standard auto, our main competitor is Pembridge Insurance Company, a subsidiary of The Allstate Corporation. Our main Canadian competition for trucking is Markel Insurance Company, a subsidiary of Northbridge Financial Corporation.

In our non-standard automobile lines in the United States, we primarily offer policies at the minimum prescribed limits in each state which are typically not greater than \$40,000 per occurrence. As a result, we do not directly compete with the larger writers of this product, namely, Progressive, Allstate, State Farm and GEICO. Our primary competitors in this fragmented market are companies such as Bristol West Holdings Inc., Infinity Property and Casualty and Direct General Corporation. In trucking lines, our major competitors in the U.S. are Old

Republic General Group, Zurich Financial Services Group and Canal Insurance Company.

We compete in both Canada and the United States with numerous smaller insurance companies in regional markets. Many of our larger competitors have greater financial and other resources than we do, have more favourable A.M. Best ratings and offer more diversified insurance coverages. In the fragmented non-standard automobile markets in the United States, however, many of our competitors are small companies with limited capital resources who generally have less favourable A.M. Best ratings and who have traditionally relied upon the support of reinsurers to supplement their capital. We believe that recent reinsurance market conditions have led to a contraction of this capital support by reinsurers.

Our competitors include other companies that, like us, serve the independent agency market, as well as companies that sell insurance directly to customers. Direct underwriters typically operate in standard lines of personal automobile and property insurance, where they have certain competitive advantages over agency underwriters. These advantages include increased name recognition obtained through extensive media advertising, loyalty of the customer base to the insurer rather than to an independent agency and, potentially, reduced policy acquisition costs and increased customer retention.

Our markets attract competition from time to time from new entrants in our niche markets. In some cases, these entrants may, because of inexperience, desire for growth or other reasons, price their insurance below the rates that we believe provide an acceptable premium for the related risk. We believe that it is generally not in our best interest to compete solely on price, and may from time to time experience a loss of market share during periods of intense price competition or "soft" market conditions.

We believe that our ability to compete successfully in our industry will be based on our:

- ability to identify specialty markets which are more likely to produce an underwriting profit;
- disciplined underwriting approach;
- diversified product and geographic platforms;
- prudent claims management;
- cost containment and the economics of shared support functions; and
- services and competitive commissions we provide to our independent agents, program managers and brokers.

Any new, proposed or potential legislative or industry developments could further increase competition in our markets. New competition from these developments could cause the prices for insurance to fall, which would adversely affect our underwriting profitability.

We employ stringent underwriting standards to develop a broad spread of risk and to receive an appropriate premium for each risk. Our underwriting philosophy stresses receiving an adequate premium and spread of risks for the business we accept. Rather than attempt to select individual risks, we seek to set premium rates at levels that should generate profitable underwriting. Once we have set premium rates that we believe are adequate, we are generally willing to accept as much business within our underwriting guidelines as is available to us. We regularly monitor premium adequacy by territory and class of business and make adjustments as required. We do not reduce our pricing when competitors offer to underwrite certain classes of business at premium rates which are below what we believe is an acceptable level. Instead, we elect to maintain our premium per risk rather than write a large number of risks at premiums which we consider to be inadequate. In such instances, our premium volumes may decrease. Underwriting profitability is primarily dependent on the claims amounts incurred on the policies sold in relation to net premiums earned. At the time premium levels are established, the claims amounts to be incurred on the policies sold is unknown, and the process for estimating claims is inherently uncertain and imprecise.

We regularly consider and implement various initiatives to address adverse profitability trends in our business. These initiatives vary by jurisdiction, but include tightening of underwriting requirements, price increases, reduction in agent commissions, policy non-renewals (where permitted) and other administrative changes. All companies writing automobile insurance in Canada and all lines of business in most U.S. jurisdictions must have

Gross Premiums Written by Geographic Area

(%)

■ Canada ■ US

their premium rates approved by the applicable regulatory authority. Once these rates are approved, an insurance company is prohibited from altering them without regulatory approval for new rates.

We market and distribute our automobile insurance products through a network of over 2,900 independent agents and approximately 30 program managers in the United States and over 3,000 independent brokers across Canada. We maintain an "open market" approach which allows these agents and brokers to place business with us with no minimum commitments and provides us with a broad, flexible and easily scalable distribution network. We believe that this approach is different from that used by many automobile insurance companies.

We focus on developing and maintaining strong relationships with our independent agents, program managers and brokers. We continually strive to provide excellent service in the local markets in which we operate, and communicate with them through a variety of channels and we look for opportunities to increase efficiency and reduce operating costs.

Our independent agents, program managers and brokers generally have the authority to bind policies on our behalf with respect to specified insurance coverages within our prescribed underwriting guidelines. These guidelines prescribe the kinds and amounts of coverage that may be written and the premium rates that may be charged for specified categories of risk. In most cases, we do not delegate authority to settle or adjust claims, establish underwriting guidelines, develop rates or enter into other transactions or commitments with our independent agents, program managers or brokers. Certain program managers have greater authority than our other independent agents and brokers. These program manager relationships are subject to a rigorous audit process to ensure that they adhere to our underwriting standards and claims handling procedures.

We write automobile insurance primarily for the non-standard automobile and trucking markets. We also write insurance in selected other lines of business for both individuals and commercial customers. Other coverages that we provide for individuals ('personal lines') include motorcycle, homeowners and selected specialty lines. Our commercial coverages include automobile (including taxis), trucking, property and selected specialty lines such as customs bonds. Our personal lines business accounted for 43% of our gross premiums written for the year ended December 31, 2006 and 57% were generated from our commercial lines.

Our automobile insurance products provide coverage in three major areas: liability, accident benefits and physical damage. Liability insurance provides coverage, where our insured is responsible for an automobile accident, for the payment for injuries and property damage to third parties. Accident benefit policies or personal injury protection policies provide

coverage for loss of income, medical and rehabilitation expenses for insured persons who are injured in an automobile accident, regardless of fault. Physical damage coverages provide for the payment of damages to an insured automobile arising from a collision with another object or from other risks such as fire or theft.

Automobile physical damage and liability coverages generally provide more predictable results than automobile personal injury insurance.

Our gross premiums written were \$1.93 billion in 2006, compared to \$1.89 billion in 2005. In 2006, we experienced a decrease of 3% in gross premiums written for our Canadian operations and an increase of 4% for our U.S. operations.

The upper table opposite sets forth our gross premiums written by line of business for the periods indicated.

We conduct our business in the United States and Canada. The lower table opposite sets forth our gross premiums written by state and province for the periods indicated.

Non-Standard Automobile

Non-standard automobile insurance accounted for 26% and 29% of our gross premiums written for the years ended December 31, 2006 and 2005, respectively. Non-standard automobile insurance is principally provided to individuals who do not qualify for standard automobile insurance coverage because of their payment history, driving record, place of residence, age, vehicle type or other factors. Such drivers typically represent higher than normal risks and pay higher insurance rates for comparable coverage. As underwriting standards for providing standard coverages have become more restrictive and many jurisdictions now require insurance regardless of driving record, high risk individuals have been forced to seek non-standard coverage and have contributed to the increase in the size of the non-standard automobile insurance market.

Non-standard automobile insurance is generally accompanied by increased loss exposure, higher claims experience and a higher incidence of consumer and service provider fraud. In addition, policy renewal rates tend to be low for non-standard automobile policies as policyholders often lapse their policies because of non-payment of premiums and subsequently reapply as new policyholders. This creates an ongoing requirement to replace non-renewing policyholders with new policyholders and to react promptly to issue cancellation notices for non-payment of premiums to mitigate potential bad debt write-offs. However, these factors are mitigated to some extent by higher premium rates, the tendency of high-risk individuals to own low value automobiles, and generally lower limits of insurance coverage as insureds tend to purchase coverage at the minimum prescribed limits.

The insuring of non-standard drivers is often transitory. When their driving records improve, insureds may qualify to obtain insurance in the standard market at lower premium rates. We often cancel our policies for non-payment of premium and, following a period of lapse in coverage, our insureds frequently return to purchase a new policy at a later date. As a result, our non-standard automobile insurance policies experience a retention rate that is lower than that experienced for standard market risks. Most of our insureds pay their premiums on a monthly instalment basis and we typically limit our risk of non-payment of premiums by requiring a deposit for future insurance premiums and the prepayment of subsequent instalments.

In the United States and Canada, automobile insurers are generally required to participate in various involuntary residual market pools and assigned risk plans that provide automobile insurance coverages to individuals or other entities that are unable to purchase such coverage in the voluntary market. For example, in Ontario and Alberta, every insurer is required to be a member of the Facility Association, an entity that was created to ensure the availability of automobile insurance to every motorist. The Facility Association selects designated carriers to provide coverage and claims handling services to drivers who are unable to purchase insurance through private carriers, in return for an administration fee. Participation in these pools in most jurisdictions is in proportion to voluntary writings of selected lines of business in that jurisdiction.

We entered into a program management agreement with the Robert Plan Corporation to assume its non-standard automobile risks commencing January 1, 2006. Later in 2006 we acquired the renewal rights of the Robert Plan Corporation's assigned risk business. In states where non-standard automobile risks are assigned to standard automobile insurance companies, we offer to assume these assigned risks from the standard insurer, through one of our subsidiaries, for a pre-agreed buy-out fee.

In Canada, we are the largest writer of non-standard automobile insurance and operate primarily in Ontario, Québec and Alberta, with Ontario being our largest market in 2006. The non-standard automobile insurance market in Canada is primarily focused on providing drivers with minimum levels of liability coverage with accident benefit insurance.

In the United States, we write non-standard automobile insurance in various states, predominantly California, New York, Illinois, and Florida. Our business in Illinois is presently concentrated in the Chicago metropolitan area, although we are expanding into other areas. In the United States, non-standard automobile insurance policies generally have lower limits of insurance

Gross premiums written by line of business

For the year ended December 31 (in millions of dollars, except for percentages)

	2006		2005

commensurate with the minimum coverage requirement under the statute of the state in which we write the business. These limits of liability are typically not greater than \$40,000 per occurrence.

In early 2007, we entered into an agreement to acquire, pending regulatory approval, Mendota Insurance Company and its subsidiary companies. Mendota is a dedicated non-standard insurance provider licensed in 43 states and currently writes business in 20 states through a network of approximately 6,000 independent agency locations.

Trucking

We provide coverage for liability, accident benefits, physical damage, cargo and comprehensive general liability under a package program throughout both Canada and the United States. In Canada, we may offer policies with limits of liability of up to C\$10 million as many of our insured trucks travel throughout the U.S. and Canada. We then purchase reinsurance to limit our exposure for any one risk or occurrence to C\$2.5 million. In the United States we do not offer primary liability policies for trucking liability in excess of \$1.0 million per risk. Recent market conditions have allowed us to increase our prices and expand our relationships.

In the year ended December 31, 2006, gross premiums written from trucking were \$634.2 million compared to \$587.4 million in 2005. Trucking insurance accounted for 33% and 31% of our gross premiums written for the years ended December 31, 2006 and 2005, respectively.

Commercial Automobile

Commercial automobile policies provide coverage for taxis, rental car fleets and garage risks. We have a significant share of the taxi insurance market in Chicago, Illinois and Las Vegas, Nevada. In the year ended December 31, 2006, gross premiums written from

commercial automobile increased by 19% to \$269.9 million compared to \$226.8 million in 2005.

Standard Automobile

Standard automobile insurance provides coverage for drivers of standard risk private passenger automobiles. Premiums for these types of policies are usually lower than premiums charged in the non-standard market for comparable coverages. However, the frequency and severity of accidents and other loss events are also typically lower. Our standard automobile business is written in Ontario and Alberta. In the year ended December 31, 2006, gross premiums written from standard automobile decreased by 17% to \$108.5 million compared to \$130.0 million in 2005.

Motorcycle

Motorcycle insurance consists primarily of liability, physical damage and personal injury insurance coverages. In Canada, we are the leading writer of motorcycle insurance, writing over 30% of the total market, and we write motorcycle insurance in the provinces of Ontario, Alberta and Québec. We also write motorcycle insurance in the United States. In the year ended December 31, 2006, gross premiums written from motorcycle increased by 15% to \$68.7 million compared to \$59.5 million in 2005.

Property (including liability)

We write property (including liability) insurance for businesses and individuals in Canada and the United States. This business focuses primarily on insuring against damage to property and accidents that may occur on such property. Our commercial property and liability business consists of risks that are either difficult to place due to class, age, location or occupancy of the risk or are associated with risks within our core lines. These risks are characterized by high premiums and limited coverage. We generally limit our exposure on commercial property to no more than C\$1.0 million in Canada and \$0.5 million in the United States on any one risk.

Our specialty property business includes insurance for restaurants, rental properties and garages. We also write non-hydrant protected homeowners insurance and habitation risks which do not qualify for coverage by writers of standard insurance.

We provide coverage on a very itemized named perils basis with relatively high rates and high deductibles for risks that are considered substandard by other companies. We believe these risks provide us with the opportunity to achieve attractive returns.

In late 2005, we acquired Zephyr Insurance Company, Inc., a provider of residential wind insurance coverage in the state of Hawaii. Zephyr's operating niche complements our core strategy of providing products and services to specific, defined segments of the insurance marketplace. Zephyr is protected by a reinsurance program further described in the reinsurance section of Management's Discussion and Analysis.

Our strategy is to operate as a niche underwriter of classes of property business that are more difficult to underwrite and offer the potential to achieve higher levels of underwriting profitability. We underwrite this business using our carefully developed underwriting methodology based on a stringent set of criteria. This type of property business is seldom subject to a high degree of competition and we have often been able to write these policies at relatively high rates with fairly restricted coverage.

Other Specialty Lines

Our other specialty lines include customs, bail and surety bonds written in both the United States and Canada. Customs bonds involve insuring the timely payment of customs duties on goods imported into the United States and Canada, as well as any penalties incurred due to late payment of the duties or administrative non-compliance. Such duties generally represent less than 5% of the face value of the imported goods. We also write contract payment and performance and other miscellaneous surety bonds as well as bail bonds in California.

Investments and Investment Income

Overview & Strategy

Our business philosophy stresses the importance of both underwriting profits and investment returns to build shareholder value. We manage our investment portfolio primarily to support the liabilities of our insurance operations and to generate investment returns. We invest predominantly in corporate, government and municipal bonds with relatively short durations. We also invest in preferred and common equity securities and other interest-bearing instruments, and we consider our finance premium receivables to be a part of our investment portfolio. Our overall investment strategy is aimed at maximizing returns without compromising liquidity and risk control. Virtually all of our investments are managed by third party investment management firms and their performance is actively monitored by management and the Investment Committee of the Board of Directors.

Our investment guidelines stress the preservation of capital, market liquidity to support payment of our liabilities and the diversification of risk. With respect to fixed income securities, we generally purchase securities with the expectation of holding them to their maturity.

Portfolio Composition

At December 31, 2006, we held cash and investments with a fair value of \$3.09 billion and a carrying value of \$3.06 billion, resulting in net unrealized gains of \$26.5 million. We currently maintain and intend to maintain an investment portfolio comprised primarily of fixed income securities. Our insurance subsidiaries' investments must comply with applicable regulations which prescribe the type, quality and concentration of investments. These regulations in the various jurisdictions in which our insurance subsidiaries are domiciled, permit investments in government, state, provincial, municipal and corporate bonds, and preferred and common equities, within specified limits and subject to certain qualifications. Our U.S. operations typically invest in U.S. dollar denominated investments, and our Canadian operations primarily invest in Canadian dollar denominated investments to mitigate their exposure to currency rate fluctuations.

Total	\$ 2,483.8	100.0%	\$ 2,371.0	100.0%

The top table on the left summarizes the fair value of our investment portfolio, including cash and cash equivalents and premium finance receivables, at the dates indicated.

The fair value of equity investments represented 13% of our investment portfolio at December 31, 2006 and 12% at December 31, 2005.

Investment results before the effect of income taxes are reflected in the middle table on the left. Our investment income, including net realized gains increased by 14% to \$149.9 million in 2006, compared to \$131.2 million in 2005. The percentages earned on average investments shown in the preceding table compare with the Lehman Brothers Eurodollar Aa or Higher 1-5 Years Index of 4.4% and 4.0% for the Scotia Capital 1-5 Year Euro Canadian Index, 15.8% for the S&P 500 Index and 17.3% for the S&P TSX Index for the twelve months ended December 31, 2006.

The bottom table on the left summarizes the fair value by contractual maturities of our fixed income investment portfolio, excluding cash and cash equivalents, at the dates indicated.

At December 31, 2006, 71% of our fixed income securities, including treasury bills, bankers' acceptances, government bonds and corporate bonds have contractual maturities of five years or less compared to 75% as at December 31, 2005.

Actual maturities may differ from contractual maturities because certain issuers have the right to call or prepay obligations with or without call or prepayment penalties. Currently, we maintain a liquid portfolio to ensure there is sufficient cash available for the payment of claims on a timely basis. We believe that our high quality, liquid investment portfolio and underwriting profit provide us with sufficient liquidity to meet obligations to our policyholders.

The following table summarizes the composition of the fair value of our fixed income investment portfolio, excluding cash and cash equivalents, at the dates indicated, by rating as assigned by S&P or Moody's Investors Service, using the higher of these ratings for any security where there is a split rating.

Credit ratings

As at December 31

2006	3,085	55.21	167

Market Risk

Market risk is the risk that we will incur losses due to adverse changes in interest or currency exchange rates and equity prices. Our primary market risk exposures are to changes in interest rates and equity prices. We have a smaller exposure to changes in the U.S. to Canadian dollar foreign currency exchange rate.

Because most of our investment portfolio is comprised of fixed income securities which are usually held to maturity, periodic changes in interest rate levels generally impact our financial results to the extent that reinvestment yields are different than the original yields on maturing securities. During periods of rising interest rates, the market value of our existing fixed income securities will generally decrease and our realized gains on fixed income securities will likely be reduced. The reverse is true during periods of declining interest rates.

Duration is a measure used to estimate the extent to which market values change with changes in interest rates. Using this measure, it is estimated that an immediate hypothetical 100 basis point parallel increase in interest rates would decrease the market value of our fixed income investments by \$76.0 million, representing 3.1% of the \$2,483.8 million fair value fixed income investment portfolio.

Fluctuations in value of our equity securities, representing approximately 13% of the fair value of the investment portfolio at December 31, 2006, due to changes in general economic or stock market conditions, affect the level and timing of recognition of gains and losses on securities we hold, causing changes in realized and unrealized gains and losses.

We do not hedge any foreign currency exposure that may exist in the portfolio. Our U.S. operations generally hold their investments in U.S. dollar denominated investments, and our Canadian operations in Canadian dollar denominated investments.

With the exception of U.S. and Canadian government bonds, it is our policy to limit our investment concentration at each of our subsidiary companies in any one issuer or related groups to less than 5% of the subsidiary company's investment portfolio.

Premiums for property and casualty insurance are typically payable at the time a policy is issued in force or renewed. To assist our insureds in making their payments to us, in some instances we offer premium financing either directly or through a separate premium finance company, whereby the insured can pay a portion of the premium in monthly instalments. The insured pays an additional amount for this option, reflecting handling costs and the income we would have earned on such premium, had we received the total amount at the beginning of the policy period. We typically collect sufficient premiums in advance of the period of risk which ensures that in the event of payment default by the insured, we should not have uncollectible balances. The option of monthly premium payments is available only where permitted under the laws or regulations of the specific jurisdictions. Some jurisdictions require the option of monthly premium payments at a specific annual interest rate or monthly charge.

Certain U.S. public companies include this premium finance income in computing their combined ratio and underwriting profit. We, however, consider our income from our premium finance activities to be a part of investment income, because this additional amount is essentially an interest payment on the balance of unpaid premium. At December 31, 2006, the balance of our financed premiums receivable was \$67.5 million compared to \$85.7 million at December 31, 2005. The fair value of financed premiums approximates their carrying amount.

Investment Portfolio

(Fair value)
(%)

Portfolio Monitoring

Virtually all of our investments are managed by third-party investment management firms and we monitor their performance. We have engaged Conning Asset Management, Royal Bank of Canada (Caribbean), Deans Knight Capital Management Limited and J. Zechner Associates Inc. to oversee the majority of the fixed income investment portfolio. In addition, Burgundy Asset Management, Burgundy International Asset Management, Deans Knight Capital Management Limited, Kingwest and Company, Marquest Investment Counsel, SFE Investment Counsel and Wellington Management Company have each been engaged to manage portions of our subsidiaries' equity investment portfolios.

The Company has recognized losses on securities for which a decline in market value was deemed to be other than temporary. We recognized charges of \$4.6 million, \$4.8 million and \$1.3 million for investment value impairment that was considered other than temporary for the years ended December 31, 2006, 2005 and 2004, respectively. In determining whether a decline in value of a security is other than temporary, the Company has applied Statement of Financial Accounting Standards No. 115, *Accounting for Certain Investments in Debt and Equity Securities*.

We perform a quarterly analysis of our investment holdings to determine if declines in market value are other than temporary. The analysis includes some or all of the following procedures:

- identifying all security holdings in an unrealized loss position that has existed for at least six months or other circumstances exist where management believe those circumstances may impact the recoverability of the security;
- obtaining a valuation analysis from third party investment managers regarding the intrinsic value of these holdings based on their knowledge, experience and other market based valuation techniques;
- reviewing the trading range of certain securities over the preceding calendar period;
- assessing if declines in market value are other than temporary for debt security holdings based on the investment grade credit rating from third party security rating agencies;
- assessing if declines in market value are other than temporary for any debt security holding with a non-investment grade credit rating based on the continuity of its debt service record; and
- determining the necessary provision for declines in market value that are considered other than temporary based on the analyses performed.

The risks and uncertainties inherent in the assessment methodology used to determine declines in market value that are other than temporary include, but may not be limited to, the following:

- the opinion of professional investment managers could be incorrect;
- the past trading patterns of individual securities may not reflect future valuation trends;
- the credit ratings assigned by independent credit rating agencies may be incorrect due to unforeseen or unknown facts related to a company's financial situation; and
- the debt service pattern of non-investment grade securities may not reflect future debt service capabilities and may not reflect a company's unknown underlying financial problems.

The length of time securities may be held in an unrealized loss position may vary based on the opinion of our appointed investment managers and their respective analyses related to valuation and to the various credit risks that may prevent us from recapturing our principal investment. In cases where our appointed investment manager determines that there is little or no risk of default prior to the maturity of a holding, we would elect to hold the security in an unrealized loss position until the price recovers or the security matures.

In situations where facts emerge that might increase the risk associated with recapture of principal, securities may be traded and losses realized. Due to the inherent volatility of equity markets, we believe there are securities that trade from time to time below their intrinsic values based on historical valuation measures. In these situations, holdings may be maintained in an unrealized loss position for different periods of time based on the underlying economic assumptions driving the investment manager's valuation of the holding.

At December 31, 2006 and December 31, 2005, the gross unrealized losses amounted to \$40.3 million and \$45.8 million, respectively. Unrealized losses attributable to non-investment grade fixed income securities at December 31, 2006 and December 31, 2005 was \$0.2 million and \$1.3 million, respectively.

At December 31, 2006 and December 31, 2005, unrealized losses related to government bonds and term deposits were considered temporary as there was no evidence of default risk. Corporate bonds, even those

below investment grade, in a material unrealized loss position, continued to pay interest and were not subject to material changes in their respective debt ratings. We concluded that a default risk did not exist at the time and, therefore, the decline in value was considered temporary. As we have the capacity to hold these securities to maturity, no investment impairment provision was considered necessary. Common stock positions in an unrealized loss position for more than six months may not be considered impaired based on the underlying fundamentals of the respective holdings. In making our investment impairment decisions, we utilized the professional expertise of our investment advisors, analyzed independent economic indicators and reviewed stock market trends.

In deciding whether to reduce the carrying value of common shares, we take into account a number of factors, including whether the decline in market value is more than 20% and has persisted for a period exceeding six months. In the case of fixed income securities, we also take into account whether the issuer is in financial distress (unable to pay interest or some other situation that would question the issuer's ability to satisfy their debt obligations).

The table below segregates the gross unrealized losses at December 31, 2006 and December 31, 2005 by security type or industry sector.

Provision for Unpaid Claims

Claims management is the procedure by which an insurance company determines the validity and amount of a claim. We focus on rigorous claims management. We investigate the actual circumstances of the incident that gave rise to the claim and the actual loss suffered. An important part of claims management is verifying the accuracy of the information provided to the insurance company at the time the policy is underwritten. The nature of non-standard automobile and trucking insurance typically requires more thorough claims management and in particular, more thorough investigative procedures and greater defense costs than many other types of insurance. Insurance claims on our policies are investigated and settled by our local claims adjusters, and we may also employ independent adjusters, private investigators, various experts and legal counsel to adjust claims. We believe that effective claims management is fundamental to our operations.

We establish a provision for unpaid claims to reflect the estimated ultimate cost of both reported but unsettled claims and also unreported claims. Our provision for unpaid claims is based on estimated liabilities on individual reported claims (case reserves), estimated provisions for claims that have not yet been reported and expected future development on case reserves; our provision for unpaid claims also includes an estimate of allocated loss adjustment expenses (primarily defense costs) and

unallocated loss adjustment expenses (primarily the adjustment handling costs by claims personnel) which we expect to incur in the future. The provision for claims not yet reported and future development on existing case reserves are sometimes referred to as provisions for incurred but not reported claims (IBNR). Our provisions for unpaid claims, including estimated future adjustment expenses, are determined using actuarial and statistical procedures and represent undiscounted estimates of the ultimate net cost of all unpaid claims and loss adjustment expenses. These estimates are continually reviewed and adjusted as experience develops and new information becomes available. Management uses actuarial and statistical procedures to allocate the IBNR by accident years and coverages.

The table on the left below shows the amounts of total case reserves and IBNR as at December 31, 2006 and 2005.

During 2006, our U.S. operations decreased case reserves by 1% and increased IBNR reserves by 15% with an increase of 5% in total reserves compared to December 31, 2005. Our Canadian operations increased case reserves by 6%, IBNR by 4% and total reserves by 5% in U.S. dollars.

The process for establishing the provision for unpaid claims reflects the uncertainties and significant judgemental factors inherent in predicting future results of both known and unknown claims. As such, the process is inherently complex and imprecise and we are constantly refining our estimates. Factors affecting the provision for unpaid claims include the continually evolving and changing regulatory and legal environment, actuarial studies, professional experience and expertise of our claims personnel and independent adjusters retained to handle individual claims, the quality of the data used for projection purposes, existing claims management practices, including claims handling and settlement practices, the effect of inflationary trends on future claims settlement costs, court decisions, economic conditions and public attitudes. In addition, time can be a critical part of the provisions' determination, because the longer the span between the incidence of a loss and the payment or settlement of the claims, the more variable the ultimate settlement amount can be. Accordingly, short-tailed claims, such as property claims,

Total case reserves and IBNR

For the year ended December 31 (in thousands of dollars)				(%)
	2006	2005	Increase	
U.S. Operations				
Case Reserves	\$ 656,383	\$ 665,309	(1%)	
IBNR	482,024	419,534	15%	
Total unpaid claims	\$ 1,138,407	\$ 1,084,843	5%	
Canadian Operations				
Case Reserves	\$ 512,769	\$ 483,337	6%	
IBNR	288,187	276,031	4%	
Total unpaid claims	\$ 800,956	\$ 759,368	5%	
Consolidated unpaid claims	\$ 1,939,363	\$ 1,844,211	5%	

tend to be more predictable than long-tailed claims, such as general liability and automobile accident benefit claims, which are less predictable. We do not have exposure to asbestos or environmental liability other than pollution coverage for oil spills as required for trucking insurance. Our provision for unpaid claims is not discounted to reflect the time value of expected future payouts of claims.

The process of establishing the provision for unpaid claims relies on the judgement and opinions of a large number of individuals, on historical precedent and trends, on prevailing legal, economic, social and regulatory trends and on expectations as to future developments. The process of determining the provision necessarily involves risks that the actual results will deviate, perhaps substantially, from the best estimates made. This evaluation includes a re-estimation of the provision for unpaid claims relating to each preceding financial year compared to the provision that we originally established. In addition, we conduct a review of all open claims each quarter and consider all factors into the provisions' calculation. Accordingly, as experience develops and new information becomes known, we adjust our reserves as necessary following these evaluations. Any adjustments are reflected in our consolidated statement of income in the period in which they become known and are accounted for as changes in estimates. Even after such adjustments, ultimate liability or recovery may exceed or be less than the revised estimates.

Each operating company separately establishes, maintains and evaluates its respective provisions for unpaid claims for statutory reporting purposes. The process undertaken by each operating company includes evaluating all of its respective policy coverages and paid and open claim level data to ascertain claim frequency and severity trends, as well as the effects, if any, inflation or changes in operating structure or process may have on future loss settlements. The management of each operating company has responsibility to ensure that the IBNR reserves are appropriate, based on lines of business and geographic region. Management incorporates all of the above information to record its best estimate of provision for unpaid claims.

Once an amount for provision for unpaid claims is established by management of each of our insurance subsidiaries, our independent appointed actuary, Towers Perrin Inc., reviews management's data and processes to ascertain whether the provision for unpaid claims as established by management is reasonably stated and within the appointed independent actuary's range of reserve estimates. As these processes are undertaken independently, the provision recorded by management can differ from the actuary's point estimate. The provisions for unpaid claims established by each operating company are then consolidated. In accordance with actuarial standards for 2006, the independent appointed actuary develops a range of reserve estimates and a recommended point estimate of reserves. For 2005 in Canada, the independent appointed actuary developed a point estimate only in accordance with actuarial standards. The point estimate is intended to represent the independent appointed actuary's best estimate and will not necessarily be at the mid-point of the high and low estimates of their range.

The range of reserve estimates for gross unpaid claims for our U.S. and Canadian operations estimated by our independent appointed actuary and the actual carried provision for unpaid claims were as follows:

Comparison of actuarial ranges for gross unpaid claims

As of December 31, 2006 (in millions of dollars)

	Low	High	Carried
U.S. Operations	\$ 991.0	\$ 1,274.9	\$ 1,138.4
Canadian Operations	684.2	915.3	801.0
Total Consolidated Provision for Unpaid Claims	\$ 1,675.2	\$ 2,190.2	\$ 1,939.4

As of December 31, 2005 (in millions of dollars)

	Low	High	Carried
U.S. Operations	\$ 992.9	\$ 1,211.5	\$ 1,084.8
Canadian Operations			759.4
Total Consolidated Provision for Unpaid Claims			\$ 1,844.2

To the extent that management's estimates of gross reserve levels at our individual insurance subsidiaries are less than the point estimates recommended by their independent appointed actuary, our policy is that those gross reserve levels will be increased to levels that are no less than the point estimate recommended by the independent appointed actuary.

The following table summarizes the provision for unpaid claims, net of recoveries from reinsurers, established as at the end of the years 1996 through 2005 for our Canadian operations and at the end of years 1998 to 2005 for our U.S. operations. The table compares the re-estimation of those liabilities as at December 31, 2006.

Provision for unpaid claims, net of recoveries from reinsurers

The foregoing table presents the development of unpaid claims liabilities reflected on our balance sheets as at each year end December 31, 1996 through December 31, 2006. The top line of the table presents the estimated provision for unpaid claims recorded at the balance sheet date for each of the indicated years. This provision represents the estimated amount of losses and loss adjustment expenses for claims unpaid at the balance sheet date, including losses that had been incurred and not reported. The table also presents the re-estimated provision for unpaid claims on a gross basis, with separate disclosure of the re-estimated reinsurance recoverable on unpaid claims for years 1997 through 2005. Information related to gross unpaid claims development is not available for the year 1996.

The development of the provision for unpaid claims is shown by the difference between estimates of claims as of the initial year end and the re-estimated liability at each subsequent year end. This is based on actual payments in full or partial settlement of claims, plus re-estimates of the payments required for claims still open or claims still unreported. Favourable development (reserve redundancy) means that the original claim estimates were higher than subsequently determined. Unfavourable development (reserve deficiency) means that the original claim estimates were lower than subsequently determined.

The table presents the cumulative amount paid with respect to the previously recorded provision as of the end of each succeeding year and the re-estimated amount of the previously recorded provision based on experience as of the end of the succeeding year. The estimate is increased or decreased as more information about the claims becomes known for individual years. For example, as of December 31, 2006, we had paid \$875.3 million of the currently estimated \$1,007.3 million of claims that had been incurred through the end of 2002; thus an estimated \$132.1 million of losses incurred prior to December 31, 2002 remain unpaid as of December 31, 2006.

The cumulative development represents the aggregate change in the estimates over all prior years. For example, unpaid claims at December 31, 1996 have developed adversely by \$7.2 million over the subsequent ten years and unpaid claims at December 31, 1999 have developed adversely by \$53.5 million over the subsequent seven years. The effect on income during the past three years due to changes in estimates of unpaid claims is shown in note 10(b) to the consolidated financial statements as the "prior years" contribution to incurred losses.

Each cumulative development amount includes the effects of all changes in amounts during the current year for prior periods and the impact of currency translation. For example, the amount of the development related to losses settled in 2006, but incurred in 2000, will be included in the cumulative development amounts for years 2000, 2001, 2002, 2003, 2004 and 2005. The deficiency identified during the year 2006 of \$64.3 million was attributable to unpaid claims as at December 31, 2005 for unpaid claims for the year 2005 and all prior years. There was a redundancy of \$93.9 million related to claims occurring in accident year 2005 and a deficiency of \$77.0 million for claims occurring in accident year 2004 and deficiencies of \$58.5 million related to claims occurring in accident year 2003, \$13.9 million to claims in 2002, \$6.1 million to claims occurring in 2001 and \$2.7 million to claims occurring in 2000 and prior years.

The upper table on the following page assists in understanding the difference between calendar year and accident year losses. Our financial statements are presented on a calendar year basis for all data. However, claims payments and changes in reserves may be made on accidents that occurred in prior years, not on business that is currently insured. Calendar year losses consist of payments and reserve changes that have been recorded in the financial statements during the applicable reporting period, without regard to the period in which the accident occurred. Calendar year results do not change after the end of the applicable reporting period, even as new claim information develops. Calendar year information is presented in note 10(b) to the consolidated financial statements which shows the claims activity and impact on income for changes in estimates of unpaid claims. Accident year losses consist of payments and reserve changes that are assigned to the period in which the accident occurred. Accident year results will change over time as the estimates of losses change due to payments and reserve changes for all accidents that occurred during that period.

The upper table on the following page is derived from the unpaid claims re-estimates on the previous page and summarizes the effect of re-estimates, net of reinsurance, on calendar year consolidated operations for the ten-year period ended December 31, 2006. The first number in each row details the amount of reserve re-estimates included in the indicated calendar year and shows the accident year to which the re-estimates apply.

Accident year versus calendar year losses

Information with respect to our liability for unpaid claims and the subsequent development of those claims is presented in the following tables.

These net increases in prior years' incurred claims, net of reinsurance, for the years ended December 31, 2006,

2005 and 2004 were \$64.3 million \$24.2 million and \$53.2 million, respectively. The following tables identify the relative contribution of the increases (decreases) in incurred claims attributable to the respective products and incurred loss years.

Provision for unpaid claims – gross

The "other" category includes all development both (favourable) and unfavourable on other lines of business that the Company's subsidiaries write and geographic portions of existing lines of business, already disclosed, where there has been little favourable or unfavourable development. The other lines of business include surety and workers' compensation lines of business.

United States Operations

Trucking

At December 31, 2006 and 2005 the provision for unpaid claims for our U.S. trucking business was \$567.6 million, and \$519.1 million, respectively. Unfavourable development related to the trucking business in the U.S. was \$59.4 million for the year ended December 31, 2006 compared to \$29.5 million in 2005. Development was experienced at Lincoln General on the trucking liability line of business for accident years 2004 and 2003 which was partially offset by favourable development in the 2005 accident year. In the U.S., we have gradually been bringing claims adjusting reserving processes on our program business in-house over the last few years. Primarily as a result of this process and the revaluation of reserves, we have recognized that the previous claims reserves were inadequate resulting in unfavourable development of the prior years' claims reserves.

Non-Standard Automobile

At December 31, 2006 and 2005 the provision for unpaid claims for our U.S. non-standard automobile business was \$224.2 million, and \$227.6 million, respectively. Unfavourable development related to the non-standard automobile business was \$1.6 million in 2006 compared to favourable development of \$30.1 million in 2005. Improved trends in loss settlement and claims handling procedures in 2005 at the U.S. operations have alleviated the unfavourable development experienced prior to 2005.

Property & Liability

During 2006, we carried out a more extensive analysis of the allocated loss adjustment expenses for those property risks which may ultimately report construction defect claims. This review resulted in the recording of increased allocated loss adjustment expenses, which resulted in unfavourable development of \$19.6 million in 2006 compared to \$10.1 million in 2005. This development was offset by favourable development on other property business.

Canadian Operations

Alberta Non-Standard Automobile

Alberta non-standard automobile business contributed \$5.2 million of prior years' favourable development in 2006, compared to unfavourable development of \$12.6 million and \$15.7 million in 2005 and 2004, respectively. Average case reserves are being increased to reflect the continued escalation in bodily injury claim settlements and improved reserving methodology have enabled the Canadian operations to show favourable development in 2006 for this line of business.

Ontario Private Passenger Automobile

Ontario automobile business contributed \$1.1 million of prior years' favourable claims development in 2006 compared to \$10.5 million of favourable development experienced in 2005. The results reflect consistent reserve methodology based on the current stable market conditions in the province of Ontario.

Trucking and Commercial Automobile

Trucking and commercial automobile business contributed \$0.2 million of unfavourable development in 2006, an improvement over the \$7.6 million reported in 2005. Improved trends in 2006 loss settlement and claims handling procedures have alleviated the unfavourable development previously experienced.

Reinsurance

We purchase reinsurance from third parties in order to reduce our liability on individual risks and our exposure to catastrophic events. Reinsurance is insurance purchased by one insurance company from another for part of the risk originally underwritten by the purchasing (ceding) insurance company. The practice of ceding insurance to reinsurers allows an insurance company to reduce its exposure to loss by size, geographic area, type of risk or on a particular policy. An effect of ceding insurance is to permit an insurance company to write additional insurance for risks in greater number or in larger amounts than it would otherwise insure independently, having regard to its statutory capital, risk tolerance and other factors.

We generally purchase reinsurance to limit our net exposure to a maximum amount on any one loss of C\$1.0 million in Canada and \$0.5 million in the United States with respect to property claims and C\$2.5 million in Canada and \$1.0 million in the United States with respect to liability claims. In addition, we purchase catastrophe reinsurance which provides coverage in the event of a series of claims arising out of a single occurrence, which limits this exposure in Canada to C\$5.0 million per occurrence to a maximum coverage of C\$145.0 million, and in the United States to \$5.0 million per occurrence to a maximum coverage of \$20.0 million. In Hawaii, for our 'wind only' specified risks policies, we are protected by a

separate catastrophe reinsurance program under a 95% quota-share treaty and excess of loss treaty. Under this program we retain up to \$7.5 million in net losses subject to a maximum cover of \$1.0 billion. Our net exposure for Canadian automobile business claims is C\$2.5 million subject to a maximum cover of C\$20.0 million. For most of the non-standard automobile business that we write in the United States, the liability is limited to the minimum statutory liability limits, which are typically not greater than \$40,000 per occurrence, depending on the state.

From April 1, 2004 to March 31, 2005, the Company maintained two quota share reinsurance arrangements in Canada and the United States with reinsurers rated A+ or better by A.M. Best. Under both treaties, the Company had the option to vary the amount of premiums ceded in any quarter, which provided flexibility in managing premium leverage. These treaties increased the ceded reinsurance in 2004 by \$194.3 million or 9.7% of gross premiums written and by \$40.8 million or 2.2% in 2005, and decreased net income for the year ended December 31, 2004 by \$3.7 million and for the year ended December 31, 2005 by \$1.1 million. Overall our external reinsurance ceded represented 13.1% of gross premiums written for the year ended December 31, 2004, 3.7% for the year ended December 31, 2005 and 6.7% for the year ended December 31, 2006.

Reinsurance ceded does not relieve us of our ultimate liability to our insureds in the event that any reinsurer is unable to meet its obligations under its reinsurance contracts. We therefore enter into reinsurance contracts with only those reinsurers who we believe have sufficient financial resources to provide the requested coverage. Reinsurance treaties are generally subject to cancellation by our reinsurers or us on the anniversary date and are subject to renegotiation annually. We regularly evaluate the financial condition of our reinsurers and monitor the concentrations of credit risk to minimize our exposure to significant losses as a result of insolvency of a reinsurer. We believe that the amounts we have recorded as reinsurance recoverables are appropriately established. However, estimating amounts of reinsurance recoverables is subject to various uncertainties and the amounts ultimately recoverable may vary from amounts currently recorded. As of December 31, 2006, we had \$208.1 million recoverable from third party reinsurers and other insurers. At December 31, 2006, approximately 91% of the receivables were due from reinsurers that were rated "A-" or higher.

Estimating amounts of reinsurance recoverables is also impacted by the uncertainties involved in the establishment of provision for unpaid claims. As our underlying reserves continue to develop, the amount ultimately recoverable may vary from amounts currently recorded. Our reinsurance recoverables are generally unsecured. We regularly evaluate our reinsurers, and the respective amounts recoverable, and an allowance for uncollectible reinsurance is provided for, if needed.

The following table summarizes the composition of the amounts due from reinsurers at December 31, 2006, by the rating as assigned by A.M. Best or Standard & Poor's to the applicable reinsurers.

Collateral is held or a provision has been made against approximately 51% of the amounts due from reinsurers with a credit rating below A-.

Composition of amounts due from reinsurers by rating

December 31, 2006		
A.M. Best / S&P Rating	2006	2005

Results of Operations

For the years ended December 31, 2006 and 2005

Gross Premiums Written

During the year ended December 31, 2006, gross premiums written were \$1.93 billion compared to \$1.89 billion in 2005. For the year ended December 31, 2006, gross premiums written for our U.S. operations were \$1.34 billion, a 4% increase from 2005, and for our Canadian operations were \$590.8 million, a decrease of 3% over 2005.

For the year ended December 31, 2006, gross premiums written from trucking and commercial automobile increased 11% to \$904.2 million, from \$814.2 million in 2005. In the trucking insurance market, we continued to increase our volume of premium written in Canada by targeting owner-operator businesses and maximizing the benefit of our North America-wide presence.

Gross premiums written for non-standard automobile decreased 10% to \$498.4 million compared with \$551.3 million in 2006 due to competitive conditions in several markets and the termination of certain programs. In the non-standard auto insurance market, we experienced lower volumes of premiums written as a result of increased competition, partially offset by the premium generated from assigned risk business in the U.S.

We experienced more competitive conditions in Illinois where gross premiums declined by 10% to \$189.7 million. We experienced growth in 2006 in New York and Hawaii as a result of the assigned risk business written through the Robert Plan and the acquisition of Zephyr, respectively, in late 2005. In Ontario, increased competition in the non-standard insurance market,

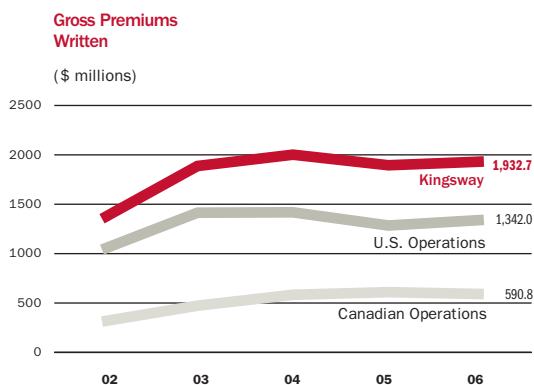

partially offset by premium increases in the owner-operator trucking segment led to a decrease of 2% in gross premiums written to \$372.6 million. The political environment, including regulated rate freezes and premium roll-backs, caused us to continue to reduce our gross premiums written in Alberta by 25% to \$70.6 million in 2006.

Net Premiums Written

Net premiums written decreased 1% to \$1.80 billion compared with \$1.82 billion for the year ended December 31, 2005. Net premiums written from our U.S. operations decreased 1% to \$1.23 billion from \$1.24 billion for the year ended December 31, 2005. Net premiums written from our Canadian operations decreased 2% to \$568.7 million compared with \$582.7 million for the year ended December 31, 2005.

Net Premiums Earned

Net premiums earned decreased 1% to \$1.77 billion for the year ended December 31, 2006, compared with \$1.79 billion for 2005. For our U.S. operations, net premiums decreased slightly to \$1.20 billion in the year ended December 31, 2006 compared with \$1.21 billion in 2005, and for our Canadian operations decreased by 3% to \$562.4 million compared with \$582.5 million in 2005.

Investment Income

Investment income increased by 30% to \$120.9 million compared with \$93.0 million for the year ended December 31, 2005. The fair value of the investment portfolio increased by 5% in 2006 due to positive cash flow from operations and financing activities. Our annualized investment yield for the year ended December 31, 2006 has increased to 4.0% compared to 3.4% in 2005. This increase is due to the reinvestment of maturing fixed income securities into higher yielding securities as short and medium term yields have increased over the past year.

Net Realized Gains

Net realized gains amounted to \$29.0 million in the year ended December 31, 2006 compared with net realized gains of \$38.2 million in 2005. The majority of these gains were realized from the disposal of equity investments. Net unrealized gains at December 31, 2006 were \$26.5 million compared to \$18.2 million at December 31, 2005.

Claims Incurred

Our claims ratio for 2006 was 69.9%, compared to 68.3% for 2005. The claims ratio for our U.S. operations was 72.7%, compared with 68.3% for 2005. The claims ratio for our Canadian operations was 63.9% compared to 68.3% for 2005. The results for 2006 and 2005 reflect increases in the provision for unpaid claims occurring prior to December 31, 2005 and December 31, 2004, respectively. These increases amounted to approximately \$64.3 million, which increased the claims ratio by 3.6% for 2006, compared to \$24.2 million and 1.4%, respectively, for 2005. Consolidated case reserves for individual claims increased 2% to \$1.17 billion as at December 31, 2006 compared to \$1.15 billion at December 31, 2005 and IBNR increased 11% to \$770.2 million at December 31, 2006 compared to \$695.6 million at December 31, 2005.

For our U.S. operations, prior years' claims development increased the claims incurred by \$75.4 million, a 6.3% increase to the claims ratio in 2006 compared to \$22.2 million, a 1.8% increase to the claims ratio in 2005. We previously outsourced most of the claims settlement and case reserving process for our U.S. program business. Over the last few years we have made a concerted effort to bring most of these arrangements in-house and have significantly increased our internal resources as part of this focused initiative. As part of these initiatives we have, over this period of time, completed a comprehensive review of all claim reserves previously handled by third parties. This review process identified several areas where the previous claims reserves were inadequate resulting in unfavourable development of the prior years' claims reserves. Trucking business contributed \$59.4 million of the unfavourable

development in 2006 compared to \$29.5 million in 2005. Property & liability business contributed \$13.5 million of the unfavourable development in 2006 compared to \$17.4 million in 2005. Allocated loss adjustment expenses on contractor's claims in the property & liability segment contributed \$19.6 million in unfavourable development in 2006 which was offset by favourable development on other property business compared to \$10.1 million in 2005.

The Canadian operations reported favourable reserve development of \$11.1 million which improved the claims ratio by 2.0% in 2006 compared to unfavourable reserve development of \$2.1 million, a 0.4% increase to the claims ratio in 2005. Alberta and Ontario trucking business contributed \$2.1 million of unfavourable development compared to \$4.7 million in 2005 and \$6.9 million in 2004. Alberta non-standard automobile contributed \$5.2 million of favourable development in 2006 compared to \$12.6 million and \$15.7 million of favourable development in 2005 and 2004, respectively.

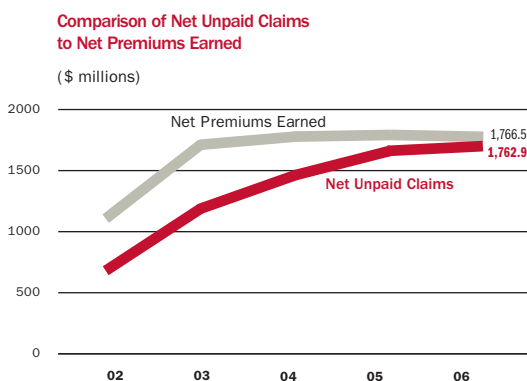

Underwriting Expenses

Our expense ratio was 28.9% in 2006 and in 2005. The expense ratio for our Canadian operations for 2006 was 30.6%, compared to 27.8% in 2005 and the expense ratio for our U.S. operations was 28.1% and 29.4%, respectively, in 2006 and 2005. General expenses increased \$26.5 million in 2006 increasing the general expense ratio to 10.3% in 2006 compared to 8.7% in 2005. Increases in professional fees related to Sarbanes-Oxley, audit and litigation account for \$12.6 million of this increase with increased personnel and salary costs accounting for \$11.2 million of the increase.

Expense Ratio

(For the year ended December 31)

	2006	2005	2004
Commission	18.6%	20.2%	18.6%
General and Administrative	10.3%	8.7%	8.3%
Expense Ratio	28.9%	28.9%	26.9%

Combined Ratio

The combined ratio was 98.8% in 2006 compared with 97.2% in 2005, which produced an underwriting profit of \$21.3 million compared with \$49.8 million in 2005. For 2006, our U.S. operations combined ratio was 100.8% (97.7% in 2005) and for our Canadian operations, the combined ratio improved to 94.5% (96.1% in 2005). Prior years' claims development increased the combined ratio by 3.6% and 1.4% for the year ended December 31, 2006 and 2005, respectively. For our U.S. operations, prior years' claims development increased the combined ratio by 6.3% in 2006 and 1.8% in 2005. For our Canadian operations, prior years' claims development decreased the combined ratio by 2.0% in 2006 and increased the combined ratio by 0.4% in 2005.

Interest Expense

Interest expense for 2006 was \$30.2 million, compared to \$25.9 million in 2005, reflecting slightly higher interest rates on our variable interest rate obligations and increased borrowings used to support increased capitalization of our subsidiaries and to repurchase and cancel shares of the Company.

Net Income and Earnings Per Share

Income before income taxes for 2006 decreased by 9% to \$139.9 million, compared to \$154.3 million in 2005. Net income for 2006 was \$123.3 million, a 9% decrease from the \$135.0 million reported for 2006. Diluted earnings per share were \$2.17 for 2006, a decrease of 8% from the \$2.37 for 2005. The decrease in net income is primarily the result of increases in estimates for net unpaid claims occurring in prior years on the program business at one of our U.S. subsidiaries.

Book Value Per Share and Return on Equity

Book value per share increased by 13% to \$16.12 at December 31, 2006 from \$14.25 at December 31, 2005. Our return on equity was 14.5% for 2006 compared to 18.4% in 2005.

Balance Sheet

Total assets as at December 31, 2006 grew to \$4.05 billion, compared to \$3.80 billion as at December 31, 2005. The investment portfolio, including cash increased to \$3.06 billion (fair value \$3.09 billion), compared to \$2.91 billion (fair value \$2.93 billion) as at December 31, 2005. The fair value of the investment portfolio per share outstanding increased 6% to \$55.21 at December 31, 2006 compared to \$51.93 as at December 31, 2005. Net unrealized gains on the investment portfolio were \$26.5 million (\$0.47 per share outstanding) at December 31, 2006 compared to \$18.2 million (\$0.32 per share) at December 31, 2005.

Results of Operations

For the years ended December 31, 2005 and 2004

Gross Premiums Written

During the year ended December 31, 2005, gross premiums written were \$1.89 billion compared to \$2.00 billion in 2004. For the year ended December 31, 2005, gross premiums written for our U.S. operations were \$1.28 billion, a 9% decrease from 2004, and for our Canadian operations were \$609.9 million, an increase of 5% over 2004.

For the year ended December 31, 2005, gross premiums written from trucking and commercial automobile decreased 1% to \$814.2 million, from \$819.5 million in 2004. Gross premiums written for non-standard automobile decreased 22% to \$551.3 million compared with \$706.3 million in 2004 due to competitive conditions in several markets and the termination of certain programs.

The amount of premium rate increases for trucking and non-standard automobile moderated in 2005. We experienced more competitive conditions in Florida and Texas where gross premiums declined by 11% to \$186.2 million and 27% to \$113.8 million, respectively. In Ontario, favourable market conditions led to an increase of 11% in gross premiums written to \$381.1 million. The political environment, including regulated rate freezes and premium roll-backs, caused us to continue to reduce our gross premiums written in Alberta by 13% to \$94.0 million in 2005.

Net Premiums Written

Net premiums written increased 5% to \$1.82 billion compared with \$1.74 billion for the year ended December 31, 2004 as lower levels of gross premiums written were more than offset by a decrease in the percentage ceded to reinsurers. Net premiums written from our U.S. operations were unchanged at \$1.24 billion. Net premiums written from our Canadian operations increased 17% to \$582.7 million compared with \$499.0 million for the year ended December 31, 2004 due primarily to a reduction in the premiums ceded to reinsurers.

Net Premiums Earned

Net premiums earned increased 1% to \$1.79 billion for the year ended December 31, 2005, compared with \$1.78 billion for 2004. For our U.S. operations, net premiums earned decreased 5% to \$1.21 billion in the year ended December 31, 2005 compared with \$1.28 billion in 2004, and for our Canadian operations increased by 16% to \$582.5 million compared with \$501.9 million in 2004.

Investment Income

Investment income increased by 25% to \$93.0 million compared with \$74.3 million for the year ended December 31, 2004. The fair value of the investment portfolio increased by 11% in 2005 due to positive cash flow from operations and financing activities. Our annualized investment yield for the year ended December 31, 2005 has increased to 3.4% compared to 3.2% in 2004. This increase is due to the reinvestment of maturing fixed income securities into higher yielding securities as short and medium term yields have increased over the past year.

Net Realized Gains

Net realized gains amounted to \$38.2 million in the year ended December 31, 2005 compared with net realized gains of \$20.4 million in 2004. The majority of these gains were realized from the disposal of equity investments. Net unrealized gains at December 31, 2005 were \$18.2 million compared to \$61.3 million at December 31, 2004.

Claims Incurred

We conducted detailed claim file reviews throughout our Canadian and U.S. operations during 2004 and 2005 to determine the adequacy of case reserving. Revised guidelines have been established for setting reserves for many of our lines, including bodily injury and accident benefit claims in all provinces of Canada which were responsible for a significant portion of the claims development experience in the prior years. As a result of these initiatives, consolidated case reserves were increased 13% during 2005 and IBNR was increased 3%. Overall, unpaid claims have increased 9% while levels of unearned premium reserves have remained relatively flat during 2005.

Our claims ratio for 2005 was 68.3%, compared to 70.9% for 2004. The claims ratio for our U.S. operations was 68.4%, compared with 70.3% for 2004. The claims ratio for our Canadian operations was 68.3% compared to 72.3% for 2004. The results for 2005 and 2004 reflect increases in provision for unpaid claims occurring prior to December 31, 2004 and December 31, 2003, respectively. These increases amounted to approximately \$24.2 million, which increased the claims ratio by 1.4% for 2005, compared to \$53.2 million and 3.0%, respectively, for 2004.

For our U.S. operations, prior years' claims development increased the claims incurred by \$22.2 million, a 1.8% increase to the claims ratio in 2005 compared to \$22.2 million, a 1.7% increase to the claims ratio in 2004. In 2005, the source of the prior years' development in the U.S. operations was primarily long haul trucking on terminated programs (\$29.5 million). We adjusted our

initial loss development factors on a number of our programs to reflect actual loss trends experienced in 2004 and these new loss development factors will be used in the prospective reserving process.

For our Canadian operations, prior years' claims development increased the claims incurred by \$2.0 million, a 0.4% increase to the claims ratio in 2005 compared to \$31.0 million, a 6.2% increase to the claims ratio in 2004. Kingsway General's Alberta non-standard automobile business contributed \$12.6 million of the prior years' claims development in 2005, compared to \$15.7 million in 2004. An increase in average reserves due to the continued escalation in bodily injury claim settlements was the reason for the adverse claims development in both 2004 and 2005 for Alberta non-standard automobile, where we increased existing case reserves based on actual settlement patterns. Our Ontario private passenger automobile business contributed \$10.5 million of favourable prior years' claims development in 2005, compared to unfavourable development of \$4.8 million in 2004. Our Canadian trucking business contributed \$4.7 million to the 2005 prior years' claims development, compared to \$6.9 million in 2004. Increases in reserves were due to larger than anticipated settlements, particularly in the U.S., which required upward adjustments to open claim files. Average claim file reserves were increased in 2005 to reflect this pattern of settlement. Our commercial automobile business in Canada contributed \$2.9 million of the prior years' claims development in 2005 compared to \$7.6 million in 2004. Case reserves were increased to reflect the increased cost on injury claims similar to the development experienced on the Ontario automobile business.

Underwriting Expenses

Our expense ratio for 2005 was 28.9% compared to 26.9% in 2004. The expense ratio for our Canadian operations for 2005 was 27.8%, compared to 25.8% in 2004 and the expense ratios for our U.S. operations were 29.4% and 27.4%, respectively, in 2005 and 2004.

Combined Ratio

The combined ratio improved to 97.2% in 2005 compared with 97.8% in 2004, which produced a record underwriting profit of \$49.8 million compared with \$39.4 million in 2004. For 2005, our U.S. operations' combined ratio was 97.7% (97.7% in 2004) and for our Canadian operations, the combined ratio improved to 96.1% (98.1% in 2004). The improvement in the combined ratio is a result of less

unfavourable development experienced in 2005, thereby lowering the loss ratio. Prior years' claims development increased the combined ratio by 1.3% and 3.0% for the year ended December 31, 2005 and 2004, respectively. For our U.S. operations, prior year claims development increased the combined ratio by 1.8% in 2005 and 1.7% in 2004, and for the Canadian operations by 0.4% in 2005 and 6.2% in 2004. Assessments from the residual market (Facility Association) resulted in an increase to underwriting profit of \$4.3 million in 2005 and \$3.4 million in 2004 which also improved the Canadian operations combined ratio by 0.7% in both 2005 and 2004.

Interest Expense

Interest expense for 2005 was \$25.9 million, compared to \$21.2 million in 2004, reflecting the increased borrowings used to support the growth in operations.

Net Income and Earnings Per Share

Income before income taxes for 2005 increased by 37% to \$154.3 million, compared to \$112.4 million in 2004. Net income for 2005 was \$135.0 million, a 34% increase over the \$101.0 million reported for 2004. Diluted earnings per share were \$2.37 for 2005, an increase of 32% over the \$1.79 for 2004. The improvement in net income is the result of improvement in the combined ratio in Canadian operations and increased investment income.

Book Value Per Share and Return on Equity

Book value per share increased by 20% to \$14.25 at December 31, 2005 from \$11.86 at December 31, 2004. Our return on equity was 18.4% for 2005 compared to 16.6% in 2004.

Balance Sheet

Total assets as at December 31, 2005 grew to \$3.80 billion, compared to \$3.52 billion as at December 31, 2004. The investment portfolio, including cash increased to \$2.91 billion (fair value \$2.93 billion), compared to \$2.58 billion (fair value \$2.64 billion) as at December 31, 2004. The fair value of the investment portfolio per share outstanding increased 10% to \$51.93 compared to \$47.04 as at December 31, 2004. Net unrealized gains on the investment portfolio were \$18.2 million (\$0.32 per share outstanding) at December 31, 2005 compared to \$61.3 million (\$1.09 per share) at December 31, 2004.

Financial Condition

Liquidity and Capital Resources

The purpose of liquidity management is to ensure that there is sufficient cash to meet all financial commitments and obligations as they fall due. The liquidity requirements of the Company's business have been met primarily by funds generated from operations, asset maturities and income and other returns received on investments. Cash provided from these sources is used primarily for claims and claim adjustment expense payments and operating expenses. The timing and amount of catastrophe claims are inherently unpredictable and may create increased liquidity requirements. The cash requirements of each quarterly dividend payment to shareholders of 7.5 cents (Canadian) per share is approximately C\$4.2 million based on the number of shares outstanding as at December 31, 2006. The dividend for the first quarter of 2007 will be paid on March 30, 2007.

We believe that we have the flexibility to obtain, from internal sources, the funds needed to fulfill our cash requirements, including the quarterly dividend, during the current financial year and also to satisfy regulatory capital requirements. However, such funds may not provide sufficient capital to enable us to pursue additional market opportunities. On November 3, 2005, the Company announced its intention to commence a normal course issuer bid ("NCIB") to repurchase up to 2,823,000 common shares of the Company, being approximately five percent of the total number of common shares then outstanding. Under this NCIB, purchases were eligible to commence on November 8, 2005 and end no later than November 7, 2006. During this period, 562,800 common shares were repurchased at an average price of C\$22.13. On November 7, 2006, the Company announced its intention to commence another NCIB to repurchase up to 2,800,000 common shares, ending no later than November 8, 2007 and being no more than five percent of the total number of common shares outstanding. Of the 2.8 million shares eligible to be repurchased under this NCIB, 242,200 had been repurchased at December 31, 2006 at an average price of C\$24.39. For the year ended December 31, 2006, 805,000 shares or 1.4% of the shares outstanding at the beginning of the year have been repurchased for a total purchase price of C\$18.4 million at an average price of C\$22.81.

Net cash provided from operations in 2004 was \$391.7 million, in 2005 was \$273.7 million and in 2006 was \$167.2 million which significantly increased our investment portfolio. Net cash provided by financing activities in 2004 was \$64.4 million, in 2005 was \$10.9 million and in 2006 was \$14.6 million.

Float

Insurance companies receive premiums well before claims are paid to policyholders. This timing difference generates a float on which the Company has an opportunity to earn investment income. The float is calculated by subtracting amounts due from reinsurers and other insurers and deferred policy acquisition costs from unpaid claims, unearned premiums and funds withheld payable to reinsurers.

The table below shows the float, split between Canadian and U.S. operations at the end of each of the last six years:

Float

As at December 31 (In thousands of dollars)

	Canadian Operations	U.S. Operations	Total
2006	\$ 865,236	\$ 1,389,962	\$ 2,255,198
2005	820,823	1,300,813	2,121,636
2004	667,906	1,332,040	1,999,946
2003	510,601	1,139,289	1,649,890
2002	262,035	779,777	1,041,812
2001	188,225	305,441	493,666

An underwriting profit reflects the benefit, in addition to investment income earned, of the float in that year. An underwriting loss reflects the cost of the float in that year, whereas an underwriting profit generates float at no cost. For the five year period to the end of 2006, the underwriting gain was \$84.9 million and the float increased by \$1.76 billion to \$2.26 billion.

The following is a description of our various financing arrangements, used to support our growth.

Bank Indebtedness

On March 5, 2004, the Company entered into a C\$150 million revolving credit facility with a syndicate of three banks. In December 2004 the facility was extended for a further 364 days and matured March 3, 2006. The facility bore interest at a floating rate based on the type of loan and the Company's senior unsecured debt rating. The amount outstanding under this facility as at December 31, 2005 was \$11,178,000, with an effective interest rate of approximately 5%.

On February 15, 2006, the Company entered into a C\$150 million 364 day revolving credit facility with a syndicate of two banks that replaced the existing facility that had a maturity date of March 3, 2006. Depending on the type of loan, the facility bore interest at a floating rate based on the Company's senior unsecured debt rating. This facility was terminated on June 23, 2006.

On June 23, 2006, the Company entered into a new \$175 million 3 year revolving facility with a syndicate of three banks. This new facility replaced the existing C\$150 million 364 day revolving credit facility

and contains similar terms, conditions and financial covenants. The amounts outstanding under this facility as at December 31, 2006 were \$51,607,000 with an effective interest rate of 5.7%.

Canadian Senior Debenture Offering

On December 6, 2002, the Company issued C\$78 million of 8.25% unsecured senior debentures with a maturity date of December 31, 2007. The debentures are redeemable prior to the maturity date, at the Company's option, upon at least 30 days notice to debenture holders. Interest on the debentures is payable semi-annually in arrears. The net proceeds to the Company were C\$77,087,420. Annual interest payments were C\$6,435,000 for each of the last three years.

U.S. Senior Note Offering

On January 29, 2004, a subsidiary of the Company, Kingsway America Inc., completed the sale of \$100 million 7.50% senior notes due 2014. The notes are fully and unconditionally guaranteed by the Company. The notes are redeemable at Kingsway America's option on or after February 1, 2009. In March 2004 an additional \$25 million of these senior notes were issued. Interest paid during the year was \$9,375,000, \$9,375,000 for 2005 and \$4,818,000 for 2004.

Subordinated Debt

Between December 4, 2002 and December 16, 2003, six subsidiary trusts of the Company issued \$90.5 million of 30 year capital securities to third parties in separate private transactions. In each instance, a corresponding floating rate junior subordinated deferrable interest debenture was then issued by Kingsway America Inc. to the trust in exchange for the proceeds from the private sale. The floating rate debentures bear interest at the rate of the London interbank offered interest rate for three month U.S. dollar deposits, plus spreads ranging from 3.85% to 4.20%, but until dates ranging from December 4, 2007 to January 8, 2009, the interest rates will not exceed 12.45% to 12.75%. The Company has the right to call each of these securities at par anytime after five years

from their issuance until their maturity. The net proceeds to the Company were \$70,877,000 after deducting expenses of \$4,625,000. Interest paid during the year was \$8,479,000, \$6,702,000 for 2005 and \$4,947,000 for 2004.

Loan Payable

On July 14, 2005 Kingsway Linked Return of Capital Trust ("KLROC Trust") completed its public offering of C\$78 million of 5.00% Kingsway Linked Return of Capital Preferred Units due June 30, 2015 of which the Company was a promoter. The net proceeds of the offering were used by KLROC Trust for a series of investments that included the purchase of a C\$74.1 million 7.12% senior note due June 30, 2015 issued by an affiliate.

Contractual Obligations

Our provision for unpaid claims do not have contractual maturity dates. We have included an estimate of when we expect our unpaid claims to be paid, based on historical payment patterns, in the table below. The exact timing of the payment of claims cannot be predicted with certainty. We maintain an investment portfolio with varying maturities and a substantial amount in short-term investments to provide adequate cash flows for the payment of claims. The unpaid claims in the table below have not been reduced for amounts recoverable from reinsurers.

As of December 31, 2006, we had approximately \$400.8 million of total indebtedness. This compares with \$360.6 million as at December 31, 2005 and \$340.3 million as at December 31, 2004. The total amount of our debt service obligations in 2007 is expected to be approximately \$31.6 million. Kingsway America's payments under its debt obligations are funded through dividends from its U.S. subsidiaries and capital infusions by Kingsway Financial.

Capital Requirements

In Canada, property and casualty insurance companies are regulated by the Office of the Superintendent of Financial Institutions ("OSFI") and the Financial Services Commission of Ontario ("FSCO") and are required to maintain a level of

Contractual Obligations

Payments Due by Period (in thousands of dollars)

Contractual Obligations	2007	2008	2009	2010	2011	Thereafter	Total
Bank Indebtedness	\$ 52,149	\$ -	\$ -	\$ -	\$ -	\$ -	\$ 52,149

Total	\$ 973,122	\$ 538,666	\$ 349,085	\$ 96,968	\$ 58,181	\$ 333,737	\$ 2,349,759

capital sufficient to achieve a target of 150% of a minimum capital test ("MCT") formula. As at December 31, 2006, each of the Canadian subsidiaries had capital in excess of the MCT. See the table opposite for a company by company analysis.

In the United States, a risk based capital ("RBC") formula is used by the National Association of Insurance Commissioners ("NAIC") to identify property and casualty insurance companies that may not be adequately capitalized. As a minimum, the NAIC requires that capital and surplus not fall below 200% of the authorized control level. As at December 31, 2006, the average statutory capital and surplus of our companies was 3.1 times the authorized control level for our U.S. subsidiaries. See the table to the right for a company by company analysis.

Our reinsurance subsidiaries, which are domiciled in Barbados and Bermuda, are required by the regulator in the jurisdictions in which they operate to maintain minimum capital levels. As of December 31, 2006, the capital maintained by Kingsway Reinsurance Corporation was 524% or \$351.9 million in excess of the regulatory requirements in Barbados. As of December 31, 2006, the capital maintained by Kingsway Reinsurance (Bermuda) Limited was 216% or \$47.1 million in excess of the regulatory requirements in Bermuda.

Based on the various regulatory restrictions, our insurance and reinsurance subsidiaries would have aggregate dividend capacity of \$515.9 million. In most jurisdictions the payment of dividends is subject to regulatory approval.

Off-Balance Sheet Financing

The Company entered into an off-balance sheet transaction through the Kingsway Linked Return of Capital Trust transaction that was completed on July 14, 2005 which is more fully described in notes 13(d) and 14 of the audited consolidated financial statements. The net proceeds from this offering were invested into a Kingsway controlled entity which is not consolidated based on accounting standards. The effect of this transaction is to show additional debt on the Company's financial statements and an offsetting equity investment of C\$8.3 million into the non-consolidated affiliated entity. The Company has one other off-balance sheet financing arrangement as discussed below.

Securitization Transaction

During the year one of the Company's U.S. subsidiaries entered into a five year revolving securitization agreement to transfer its premium finance receivables to a third party Trust. The premium finance receivables are generally for a six month term corresponding to the underlying insurance policy issued by the U.S. subsidiary. The Company sold finance premium receivables of \$16.0 million to the Trust, recorded an associated retained interest in the discounted cash flows from the cash reserve deposit maintained with

the Trust and established a liability for future servicing costs. The effect of this off-balance sheet arrangement is to remove the related premium finance receivable asset from the balance sheet.

Standard & Poor's Rating of Kingsway Financial's Counterparty Credit and Senior Unsecured Debt

On January 29, 2004, Standard & Poor's issued its rating of "BBB-" on the \$100 million of our senior notes due 2014 issued in January 2004. On March 8, 2004, Standard & Poor's issued its rating of "BBB-" on an additional \$25 million of our senior notes due 2014 issued in March 2004.

On March 17, 2005 and June 13, 2006, Standard and Poor's Rating services reaffirmed its counterparty and senior unsecured debt credit ratings on Kingsway Financial of "BBB-" with a stable outlook. On August 3, 2005, Standard & Poor's issued its rating of "BBB-" on the Kingsway Return of Capital Trust.

According to Standard & Poor's, a BBB- rating (fourth out of nine rating levels) indicates that the obligation has adequate protection parameters; however, adverse economic conditions or changing circumstances are more likely to lead to a weakened capacity of the obligor to meet its financial commitments under the obligation. A plus or minus designation within a ratings category indicates relative standing within the category.

DBRS's Rating of our Senior Debentures and Senior Notes

On January 31, 2006, Dominion Bond Rating Service Limited ("DBRS") confirmed its previous rating of "BBB" with a stable outlook on the Senior Debentures. According to DBRS, a "BBB" rating (fourth out of nine rating levels) indicates that protection of interest and principal is considered adequate, but that the entity is more susceptible to adverse changes in financial and economic conditions, or there may be other adversities present which reduce the strength of the entity and its rated securities. DBRS also assigned a rating trend of "stable" to our Senior Debentures. According to DBRS, a rating trend gives an indication of what direction the rating in question is headed should the given conditions and tendencies continue.

On July 22, 2005, DBRS issued its rating of Pfd-3 (high) with a stable outlook on the Kingsway Return of Capital Trust. According to DBRS, a Pfd-3 rating (third out of six rating levels) indicates adequate credit quality.

On January 31, 2006, DBRS confirmed its previous rating of "BBB" with a stable outlook on \$125 million of our senior notes issued in January and March 2004.

On January 31, 2006, DBRS reaffirmed the Company's financial strength rating of "BBB" with a stable outlook.

Impact of Ratings Changes

We would expect that a downgrade in our rating by either Standard & Poor's or DBRS would have a negative impact on our business, such as causing an increase in the interest rate on our bank credit facility.

Shareholders' Equity

As a result of our profitability, shareholders' equity increased 12% to \$901.0 million at December 31, 2006 compared to \$804.7 million at December 31, 2005. During 2006, our shareholders' equity decreased by \$2.9 million as a result of the currency translation adjustment of our Canadian dollar denominated assets into U.S. dollars. Book value per share outstanding was \$16.12 per share at December 31, 2006, an increase of 13% compared to \$14.25 per share at December 31, 2005.

Legal Proceedings

In the ordinary course of business, we are, from time to time, involved in various claims and legal proceedings, including class actions. While it is not possible to estimate the final outcome of these various proceedings at this time, we do not believe the outcome of such proceedings will have a material impact on our financial condition or results of operations.

Systems and Technology

We believe information systems and technology are significant contributors to operational efficiency, customer service and the effective management of our business. On-going investments in information technology will introduce new capabilities and enhance current systems to support electronic commerce and electronic data interchange with our independent agents, brokers, program managers and other business partners. We are creating secure internet access to information, documents, premium payments, and policy quoting, issue, and maintenance. Duplicate entry of information will be reduced by moving transactions electronically between our systems and our partners' systems. Back office systems for claims management, billing, and reinsurance are being enhanced. Workflow and document management technology will help us achieve greater efficiency and better customer service. Management information and business intelligence applications will help us to manage our growing business.

Employees

As of December 31, 2006, we employed approximately 2,440 personnel, of whom approximately 920 are located in Canada and approximately 1,520 are located in the United States. None of our employees are represented by a labour union and we have never experienced a work stoppage. We believe our relationship with our employees is good.

Quarterly Results

Quarterly results

(In thousands of dollars, except earnings per share amounts)

	2006				2005			
	Q4	Q3	Q2	Q1	Q4	Q3	Q2	Q1
Gross premiums written	\$ 409,115	\$ 483,903	\$ 532,489	\$ 507,243	\$ 439,267	\$ 452,341	\$ 478,446	\$ 524,606
Net premiums earned	424,977	458,309	456,196	427,015	445,372	461,446	469,300	415,825
Net income	16,848	37,405	40,174	28,882	35,901	31,339	29,647	38,121
Earnings per share								
Basic	\$ 0.30	\$ 0.67	\$ 0.71	\$ 0.51	\$ 0.64	\$ 0.55	\$ 0.52	\$ 0.68
Diluted	0.30	0.66	0.71	0.51	0.63	0.55	0.52	0.67

Kingsway's quarterly earnings, revenue and expenses are modestly affected by seasonal factors. In 2005 and 2006 the most significant factors contributing to the trend of quarterly earnings were the increases in estimates for unpaid claims from prior accident years, the realized net gains from the investment portfolio, currency fluctuations and positive cash flow generated from operating activities which has enabled the Company to increase its investment portfolio. In 2006 gross premiums written have mainly been affected by the softening market conditions in Canada and the U.S. These softening market conditions have been partially offset by premium contributions from Zephyr Insurance Company which was acquired in late 2005 and assigned risk business from The Robert Plan agreement which was entered into in late 2005.

Fourth Quarter Results

Gross premiums written in the fourth quarter of 2006 declined 7% to \$409.1 million compared to \$439.3 million reported in the fourth quarter of 2005. This decrease reflects the softening conditions in certain U.S. and Canadian markets, partially offset by premium contributions from Zephyr Insurance Company and assigned risk business from The Robert Plan agreement.

Net premiums earned were \$425.0 million in the fourth quarter of 2006 a decline of 5% compared to \$445.4 million for the fourth quarter of 2005. This decrease is consistent with the decrease in gross premiums written.

Total revenue for the fourth quarter of 2006 includes net realized investment gains of \$11.2 million compared to \$8.2 million of gains reported in the fourth quarter of 2005. Investment income increased 22% to \$30.4 million in the fourth quarter of 2006 compared to \$24.9 million for the fourth quarter of 2005.

Net income in the fourth quarter of 2006 decreased 53% to \$16.8 million compared to \$35.9 million reported in the fourth quarter of 2005. The decrease is a result of unfavourable claims development of \$53.6 million, partially offset by improved investment income of \$8.5 million, in the fourth quarter of 2006 compared to \$19.3 million in the fourth quarter of 2005. The

unfavourable prior year development, partially offset by current year favourable development, resulted in the combined ratio increasing to 104.1% for the fourth quarter of 2006 compared to 97.7% reported for the fourth quarter of 2005. As a result of the decreased net income, basic earnings per share and diluted earnings per share for the fourth quarter of 2006 decreased to 30 cents, or a 53% and 52% decrease, respectively, from the 64 cents and 63 cents reported in the fourth quarter of 2005.

Controls and Accounting Policies

Disclosure Controls and Procedures

Disclosure controls and procedures are designed to provide reasonable assurance that all relevant information is gathered and reported to senior management, including the President and CEO ("CEO") and Executive Vice President and CFO ("CFO"), on a timely basis so that appropriate decisions can be made regarding public disclosure.

An evaluation of the effectiveness of the design and operation of the Company's disclosure controls and procedures was conducted as of December 31, 2006 by and under the supervision of the Company's management, including the CEO and CFO. Based on this evaluation, the CEO and CFO have concluded that such disclosure controls and procedures, as defined in Multilateral Instrument 52-109, Certification of Disclosure in Issuers' Annual and Interim Filings, and in Rule 13a-15(e) under the Securities Exchange Act of 1934 ("the Exchange Act") were effective as of such date to ensure that information relating to the Company required to be disclosed in reports that are filed or submitted under Canadian securities legislation and the Exchange Act are recorded, processed, summarized and reported within the time periods specified by those laws.

Changes in Internal Control Over Financial Reporting

There have been no changes in Kingsway's internal control over financial reporting during the year ended December 31, 2006, that have materially affected, or are reasonably likely to materially affect its internal control over financial reporting.

Critical Accounting Estimates

Our significant accounting policies are described in note 1 to the audited consolidated financial statements included on pages 66 and 67 of the annual report. The preparation of financial statements in conformity with generally accepted accounting principles in Canada requires management to make certain estimates and assumptions, some of which may relate to matters that are uncertain. As more information becomes known, these estimates and assumptions could change and thus have a material impact on the Company's financial condition and results of operations in the future. The most significant estimates and assumptions used in preparing our financial statements are described below.

Provision for unpaid claims

A significant degree of judgement is required to determine amounts recorded in the financial statements for the provision for unpaid claims. The process for establishing the provision for unpaid claims reflects the uncertainties and significant judgemental factors inherent in predicting future results of both known and unknown claims. Further information regarding our provision for unpaid claims is discussed in the Provision for Unpaid Claims section of Management's Discussion and Analysis and in note 1(i) and 10 to the consolidated financial statements.

Impairment of investments

The establishment of an other-than-temporary impairment on an investment security requires a number of judgements and estimates. Management performs a quarterly analysis of our investment holdings to determine if declines in market value are other than temporary. Further information regarding our detailed analysis and factors considered in establishing an other-than-temporary impairment on an investment security are discussed within the Portfolio Monitoring section in the Investments and Investment Income section of Management's Discussion and Analysis.

Goodwill and intangible assets

Goodwill and intangible assets with an indefinite life are assessed for impairment at least annually by applying a fair value based test. In determining fair value, valuation models such as price-to-earnings ratios and other multiples are used. Management must make estimates and assumptions in determining the fair value of a business segment which may affect any resulting impairment write-down. Additional information regarding our goodwill and intangible asset accounting policy is included in note 1(f) to the consolidated financial statements.

Income taxes

The provision for income taxes is calculated based on the expected tax treatment of transactions recorded in our consolidated financial statements. In determining our provision for income taxes, we interpret tax legislation in a variety of jurisdictions and make assumptions about the expected timing of the reversal of future tax assets and liabilities and the valuation of future income tax assets related to tax loss carryforwards. Additional information regarding our income tax provision is included in note 1(l) and note 9 to the consolidated financial statements.

Future change in accounting policy

In April 2005, the CICA issued three new standards, Section 3855 Financial Instruments – Recognition and Measurement, Section 3865 Hedges and Section 1530 Comprehensive Income, effective for years starting on or after October 1, 2006. The Company adopted these standards on January 1, 2007.

The new rules require the Company to classify all financial instruments as held for trading, held to maturity, available for sale or as loans and receivables.

The majority of the Company's financial instruments will be classified as available for sale and be reported on the financial statements at fair value, with the changes in the unrealized gains or losses reported in a new component of shareholders' equity called "other comprehensive income". The remainder will be classified as either loans or receivables which will continue to be carried at amortized cost or as held for trading and will be carried at fair market value with the changes in unrealized gains or losses reported in net income.

The effect of the adoption of the new standards on the balance sheet at January 1, 2007 will be to increase shareholders' equity by \$26.5 million.

Risk Factors

In 2006, we formed a working group to report to the Board of Directors on the process of formalizing our control and management of risk under the heading of Enterprise Risk Management. The recommendations of this working group have been approved by the Board of Directors. The initial stages of creating a formalized Risk Management framework have begun, and the process will be complete by the end of 2007.

You should carefully consider the risks described below and all other information contained in this annual report, including the financial statements and accompanying notes. The risks and uncertainties described below are those we currently believe to be material, but they may not be the only ones we face. If any of the following risks, or any other risks and uncertainties that we have not yet identified or that we currently consider not to be material, actually occur or become material risks, our business, prospects, financial condition, results of operations and cash flows could be materially and adversely affected.

Our insurance subsidiaries' provisions for unpaid claims may be inadequate, which would result in a reduction in our net income and might adversely affect our financial condition.

Our insurance subsidiaries' provisions for unpaid claims do not represent an exact calculation of our actual liability, but are estimates involving actuarial and statistical projections at a given point in time of what we expect to be the cost of the ultimate settlement and administration of known and unknown claims. The process for establishing the provision for unpaid claims reflects the uncertainties and significant judgemental factors inherent in estimating future results of both known and unknown claims and as such, the process is inherently complex and imprecise. These estimates are based upon various factors, including:

- Actuarial projections of the cost of settlement and administration of claims reflecting facts and circumstances then known;
- Estimates of future trends in claims severity and frequency;
- Judicial theories of liability;
- Variability in claims handling procedures;
- Economic factors such as inflation;
- Judicial and legislative trends, and actions such as class action lawsuits and judicial interpretation of coverages or policy exclusions; and
- The level of insurance fraud.

Most or all of these factors are not directly quantifiable, particularly on a prospective basis, and the effects of these and unforeseen factors could negatively impact our ability to accurately assess the risks of the policies that we write. In addition, there may be significant reporting lags between the occurrence of the insured event and the time it is actually reported to the insurer and additional lags between the time of reporting and final settlement of claims.

We continually refine our estimates in an ongoing process as claims are reported and settled. The following factors may have a substantial impact on our future claims incurred:

- The amounts of claims payments;
- The expenses that we incur in resolving claims;
- Legislative and judicial developments; and
- Changes in economic conditions, including inflation.

As time passes and more information about the claims becomes known, the estimates are appropriately adjusted upward or downward to reflect this additional information. Because of the elements of uncertainty encompassed in this estimation process, and the extended time it can take to settle many of the more substantial claims, several years of experience may be required before a meaningful comparison can be made between actual losses and the original provision for unpaid claims.

The development of the provision for unpaid claims is shown by the difference between estimates of claims as of the initial year end and the re-estimated liability at each subsequent year end. Favourable development (reserve redundancy) means that the original claims estimates were higher than subsequently determined or re-estimated. Unfavourable development (reserve deficiency) means that the original claims estimates were lower than subsequently determined or re-estimated. In recent years, we have experienced reserve deficiencies on prior periods. Although we have made adjustments in our reserving practices, we cannot assure you that we will not have additional reserve development in the future. In addition, we have in the past, and may in the future, acquire other insurance companies. We cannot assure you that the provisions for unpaid claims of the companies that we acquire are or will be adequate.

Actual claims and claim adjustment expenses we incur under insurance policies that we write may deviate, perhaps substantially, from the amounts of provisions reflected in our financial statements. To the extent that actual claims incurred exceed our expectations and the provision for unpaid claims reflected on our financial statements, we will be required to reflect those changes by increasing our provision for unpaid claims. In addition, government regulators could require that we increase our provisions if they determine that our provision for unpaid claims were understated in the past. When we increase the provision for unpaid claims, our pre-tax "strengthening" of the provision for unpaid claims causes a reduction in our insurance subsidiaries' surplus which could cause a downgrading of the ratings of our insurance subsidiaries. Any such downgrade could, in turn, adversely affect our ability to sell insurance policies. See the Risk Factors section on claims-paying ratings for a more detailed discussion of the impact of a ratings downgrade.

We may experience difficulty in managing our growth, which could adversely affect our results of operations and financial condition.

Growth may place a strain on our management systems and operational and financial resources. We plan to continue to expand our specialty focus into selected regional markets in the United States and Canada and to increase the distribution of our core products in our existing markets. Our future growth and the successful integration and management of new program manager relationships, acquired businesses and other new business involve numerous risks that could adversely affect our profitability, and are contingent on many factors, including:

- expanding our financial, operational and management information systems;
- managing our relationships with independent agents, program managers and brokers, including maintaining adequate controls;
- expanding our executive management and the infrastructure required to effectively control our growth;
- maintaining ratings for certain of our insurance subsidiaries;
- increasing the statutory capital of our insurance subsidiaries to support growth in written premiums;
- accurately setting provisions for claims for new business where historical underwriting experience may not be available;
- obtaining regulatory approval for appropriate premium rates; and
- obtaining the required regulatory approvals to offer additional insurance products or to expand into additional states or provinces.

We cannot assure you that we will be able to manage our growth effectively or that we will be successful in expanding our business, that our existing infrastructure will be able to support additional expansion or that any new business will be profitable. If we are unable to manage our growth, our results of operations and financial condition may be adversely affected.

Our business is subject to risks related to litigation and regulatory actions.

In addition to the occasional employment-related litigation, we are a defendant in a number of claims relating to our insurance and other related business operations. We may from time to time be subject to a variety of legal and regulatory actions relating to our current and past business operations, including, but not limited to:

- Disputes over coverage or claims adjudication;
- Disputes regarding sales practices, disclosure, premium refunds, licensing, regulatory compliance and compensation arrangements;
- Disputes with our agents, producers or network providers over compensation and termination of contracts and related claims;
- Disputes relating to customers regarding the ratio of premiums to benefits in our various business lines;
- Disputes with taxing authorities regarding our tax liabilities; and
- Disputes relating to certain businesses acquired or disposed of by us.

In addition, plaintiffs continue to bring new types of legal claims against insurance and related companies. Current and future court decisions and legislative activity may increase our exposure to these types of claims. Multiparty or class action claims may present additional exposure to substantial economic, non-economic or punitive damage awards. The loss of even one of these claims, if it resulted in a significant damage award or a judicial ruling that was otherwise detrimental, could create a precedent in our industry that could have a material adverse effect on our results of operations and financial condition. This risk of potential liability may make reasonable settlements of claims more difficult to obtain. We cannot determine with any certainty what new theories of recovery may evolve or what their impact may be on our business.

We may be subject to governmental or administrative investigations and proceedings in the context of our highly regulated sectors of activity. We cannot predict the outcome of these investigations, proceedings and reviews, and cannot assure you that such investigations, proceedings or reviews or related litigation or changes in operating policies and practices would not materially adversely affect our results of operations and financial

condition. In addition, if we were to experience difficulties with our relationship with a regulatory body in a given jurisdiction, it could have a material adverse effect on our ability to do business in that jurisdiction.

The insurance and related businesses in which we operate may be subject to periodic negative publicity which may negatively impact our financial results.

Our products and services are ultimately distributed to individual consumers. From time to time, consumer advocacy groups or the media may focus attention on insurance products and services, thereby subjecting our industry to periodic negative publicity. We also may be negatively impacted if participants in one or more of our markets engages in practices resulting in increased public attention to our businesses. Negative publicity may also result in increased regulation and legislative scrutiny of practices in the property and casualty ("P&C") insurance industry as well as increased litigation, which may further increase our costs of doing business and adversely affect our profitability by impeding our ability to market our products and services, requiring us to change our products or services or increasing the regulatory burdens under which we operate.

We rely on independent agents, program managers and brokers and are exposed to risks.

We market and distribute our automobile insurance products through a network of over 2,900 independent agents and approximately 30 program managers in the United States and over 3,000 independent brokers across Canada. In 2006, approximately 65% of our gross written premiums in the United States were sourced through program managers and approximately 35% were sourced through independent agents. Our insurance products are marketed through a large number of independent agents, program managers and brokers and we rely heavily on their ability to attract new business. These independent agencies and program managers typically represent more than one insurance company, which may expose us to competition within the agencies and, therefore, we cannot rely on their commitment to our insurance products. In some markets, we operate pursuant to "open market" arrangements in which we have no formal relationships with the brokers who place our risk in these markets. Loss of all or a substantial portion of the business provided by these intermediaries could have a material adverse effect on our business, results of operations and financial condition.

Our independent agents, program managers and brokers generally have the ability to bind insurance policies and a few program managers may settle claims on our behalf, actions over which we have only a limited ability to exercise control. In the event that an independent

agent, program manager or broker exceeds its authority by binding us on a risk that does not comply with our underwriting guidelines, we may be at risk for that policy until we effect a cancellation. Although to date we have not experienced a material loss from improper use of binding authority by our agents, program managers or brokers, any improper use of such authority may result in losses that could have a material adverse effect on our business, results of operations and financial condition.

In accordance with industry practice, our customers often pay the premiums for their policies to agents, program managers or brokers for payment to us. These premiums are considered paid when received by the agent, program manager or broker and thereafter the customer is no longer liable to us for those amounts, whether or not we have actually received the premiums from the agent, program manager or broker. Consequently, we assume a degree of risk associated with our reliance on independent agents, program managers and brokers in connection with the settlement of insurance balances.

In addition, program managers are subject to regulation as insurance producers, including licensing requirements, and, to the extent that the program manager has the ability to bind insurance policies and to settle claims, the program manager is subject to regulation of these functions. Noncompliance by any of our program managers with applicable regulatory requirements could have adverse regulatory implications on us.

Engaging in acquisitions involves risks and, if we are unable to effectively manage these risks, our business may be materially harmed.

From time to time we engage in discussions concerning acquisition opportunities and, as a result of such discussions, may enter into acquisition transactions. Acquisitions entail numerous risks, including the following:

- difficulties in the integration of the acquired business;
- assumption of unknown material liabilities, including deficient provisions for unpaid claims;
- diversion of management's attention from other business concerns;
- failure to achieve financial or operating objectives; and
- potential loss of policyholders or key employees of acquired companies.

We may not be able to integrate successfully any business, operations, personnel, services or products that we may acquire in the future.

The highly competitive environment in which we operate could have an adverse effect on our business, results of operations and financial condition.

The P&C markets in which we operate are highly competitive. We compete, and will continue to compete, with major North American and other insurers, many of which have greater financial, marketing and management resources than we do. There may also be other companies that may be planning to enter the insurance industry of which we are not aware. Insurers in our markets generally compete on the basis of price, consumer recognition, coverages offered, claims handling, financial stability, customer service and geographic coverage. Although our pricing is influenced to some degree by that of our competitors, we generally believe that it is not in our best interest to compete solely on price, and may from time to time experience a loss of market share during periods of intense price competition. Our business could be adversely impacted by the loss of business to competitors offering competitive insurance products at lower prices. This competition could affect our ability to attract and retain profitable business.

In our non-standard automobile business, we compete with both large national underwriters and smaller regional companies. Our competitors include other companies that, like us, serve the independent agency market, as well as companies that sell insurance directly to customers. Direct underwriters may have certain competitive advantages over agency underwriters, including increased name recognition, loyalty of the customer base to the insurer rather than to an independent agency and reduced costs to acquire policies. Any new, proposed or potential legislative or industry developments could further increase competition in our markets. New competition from these developments could cause the demand for our products to decrease, which would adversely affect our profitability.

Additionally, in certain provinces or states, government operated risk plans may provide non-standard automobile insurance products at a lower price than those we provide.

From time to time, our markets may also attract competition from new entrants. In some cases, such entrants may, because of inexperience, the desire for new business or for other reasons, price their insurance below the rates that we believe offer an acceptable premium for the related risk. Further, a number of our competitors, including new entrants to our markets, are developing

e-business capabilities which may impact the level of business transacted through our more traditional distribution channels or which may affect pricing in the market as a whole.

Our operating results may fluctuate as a result of many factors, including cyclical patterns in the P&C insurance industry and in the automobile insurance market.

The results of companies in the P&C insurance industry have historically been subject to significant fluctuations and uncertainties. The industry's profitability can be affected significantly by many factors, including:

- rising costs that are not known by companies at the time they price their products, such as unforeseen case law developments;
- unpredictable developments, including weather-related and other natural catastrophes;
- changes in insurance and tax laws and regulation, as well as new legislative initiatives; and
- general economic conditions, such as fluctuations in interest rates, inflationary pressures and other changes in the investment environment, which affect returns on invested capital and may impact the ultimate payout of loss amounts.

In addition, the profitability of automobile insurers can be affected significantly by many factors, including:

- regulatory regimes which limit the ability of insurers to detect and defend against fraudulent claims and fraud rings;
- developing trends in tort and class action litigation which may encourage frivolous litigation or expose automobile insurers to allegations of bad faith;
- changes in consumer protection laws which could limit the use of used or like kind and quality after-market parts or to compel compensation for alleged diminution in value notwithstanding repair of the vehicle; and
- changes in laws or regulations, including the adoption of consumer initiatives regarding rates charged for automobile or other insurance coverage or claims handling procedures.

The financial performance of the P&C insurance industry has historically tended to fluctuate in cyclical patterns of "soft" markets characterized generally by increased competition resulting in lower premium rates followed by "hard" markets characterized generally by lessening competition and increasing premium rates. Although an individual insurance company's financial performance depends on its own specific business characteristics, the profitability of most property and casualty insurance companies tends to follow this cyclical market pattern with profitability generally increasing in hard markets and decreasing in soft markets.

Our operations are restricted by the terms of our credit agreements and debt indentures, which could limit our ability to plan for or to react to market conditions or meet our capital needs.

Our credit agreements and debt indentures contain numerous covenants that limit our ability, among other things, to borrow money, make particular types of investments or other restricted payments, sell assets, merge or consolidate, pay dividends or redeem capital stock, and incur liens to secure indebtedness. These agreements also require us to maintain specified financial ratios. The covenants under our debt agreements could limit our ability to plan for or react to market conditions or to meet our capital needs. Our ability to comply with the capital surplus ratios and other financial covenants in these agreements may be affected by events beyond our control and we may have to curtail some of our operations and growth plans to maintain compliance.

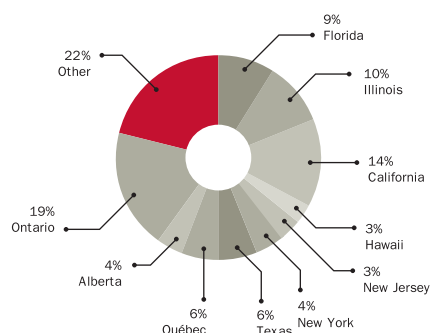

If we are not able to comply with the covenants and other requirements contained in our credit agreements and debt indentures, an event of default under the relevant debt instrument could occur. If an event of default does occur, it could trigger a default under our other debt instruments, we could be prohibited from accessing additional borrowings, and the holders of the defaulted debt instrument could declare amounts outstanding with respect to such debt to become immediately due and payable. Upon such an event, our assets and cash flow may not be sufficient to fully repay borrowings under our outstanding debt instruments. In addition, such a repayment under an event of default could adversely affect our liquidity and force us to cease or substantially slow our growth.

If we are unable to maintain our current claims-paying ratings, our ability to write insurance and to compete with other insurance companies may be adversely impacted.

Third party rating agencies assess and rate the claims-paying ability of insurers and reinsurers based

Gross Premiums Written by Geographic Area

(%)

upon criteria that they have established. Periodically these rating agencies evaluate us to confirm that we continue to meet the criteria of the ratings previously assigned to us. Financial strength ratings are an important factor in establishing the competitive position of insurance companies and may be expected to have an effect on an insurance company's premiums.

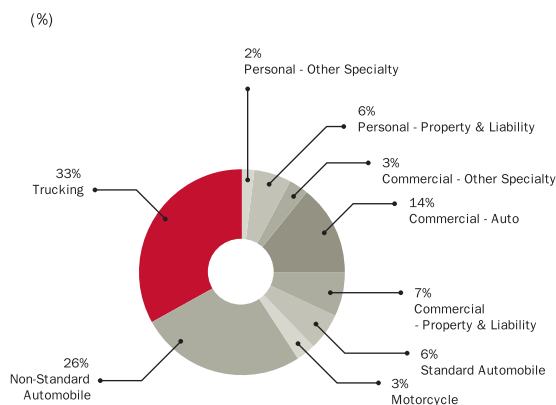

All of our insurance companies with the exception of Zephyr are rated by A.M. Best, which issues independent opinions of an insurer's financial strength and its ability to meet policyholder obligations. Of our Canadian subsidiaries, Jevco Insurance Company possesses an "A-" (Excellent) rating (fourth highest of 15 rating levels) and Kingsway General Insurance Company and York Fire & Casualty Insurance Company, possess a "B++" (Very Good) rating from A.M. Best (fifth highest of 15 rating levels). Of our U.S. subsidiaries, Lincoln General Insurance Company, Universal Casualty Company, Southern United Fire Insurance Company and American Service Insurance Company have an "A-" (Excellent) rating (fourth highest of 15 rating levels), American Country Insurance Company and U.S. Security Insurance Company have a "B+" (Very Good) rating (sixth highest of 15 rating levels). According to A.M. Best, companies rated as A and A- (Excellent) are deemed "secure". These ratings are assigned to insurers which have, on balance, excellent balance sheet strength, operating performance and business profile when compared to the standards established by A.M. Best and, in A.M. Best's opinion, have a strong ability to meet their ongoing obligations to policyholders. According to A.M. Best, insurers rated as B++ and B+ (Very Good) are deemed "secure" and have, on balance, very good balance sheet strength, operating performance and business profile when compared to the standards established by A.M. Best and, in A.M. Best's opinion, have a good ability to meet their ongoing obligations to policyholders.

We cannot provide assurance that A.M. Best will not downgrade our ratings or place them under review with negative implications in the future. If we are unable to maintain our current ratings, our ability to write insurance business and compete with other insurance companies may be adversely affected. Rating agencies evaluate insurance companies based on financial strength and the ability to pay claims, factors which are more relevant to policyholders than to investors. Financial strength ratings by rating agencies are not ratings of securities or recommendations to buy, hold or sell any security and should not be relied upon as such.

The majority of our gross premiums written are derived from the non-standard automobile and trucking insurance markets. If the demand for insurance in these markets declines, our results of operations could decline significantly.

For the year ended December 31, 2006, approximately 33% of our gross premiums written were attributable to trucking insurance and 26% were attributable to non-standard auto insurance. The size of both the trucking insurance and non-standard automobile markets can be affected significantly by many factors outside of our control, such as the underwriting capacity and underwriting criteria of standard automobile insurance carriers and trucking insurers, and we may be specifically affected by these factors. Additionally, an economic downturn in one or more of our principal markets could result in fewer automobile sales and a lower volume of goods shipped by truck, resulting in less demand for these insurance products. To the extent that these insurance markets are affected adversely for any reason, our gross premiums written will be disproportionately affected due to our substantial reliance on these insurance markets.

Gross Premiums Written by Business Line

If we fail to comply with applicable insurance laws or regulatory requirements, our business, results of operations and financial condition could be adversely affected.

As an insurance company, we are subject to numerous laws and regulations. These laws and regulations delegate regulatory, supervisory and administrative powers to federal, provincial or state insurance commissioners and agencies. Such regulation generally is designed to protect policyholders rather than shareholders, and is related to matters including:

- rate setting;
- risk-based capital and solvency standards;
- restrictions on the amount, type, nature, quality and quantity of investments;
- the maintenance of adequate reserves for unearned premiums and unpaid claims;
- restrictions on the types of terms that can be included in insurance policies;
- standards for accounting;
- marketing practices;
- claims settlement practices;
- the examination of insurance companies by regulatory authorities, including periodic financial and market conduct examinations;
- the licensing of insurers and their agents;
- limitations on dividends and transactions with affiliates;
- approval of certain reinsurance transactions; and
- insolvency proceedings.

In addition, these statutes typically require us to periodically file financial statements and annual reports, prepared on a statutory accounting basis, and other information with insurance regulatory authorities, including information concerning our capital structure, ownership, financial condition and general business operations. We allocate considerable time and resources to comply with these requirements.

Any failure to comply with applicable laws or regulations could result in the imposition of fines or significant restrictions on our ability to do business, which could adversely affect our results of operations or financial condition. In addition, any changes in laws or regulations, including the adoption of consumer initiatives regarding rates charged for automobile or other insurance coverage or claims handling procedures, could materially adversely affect our business, results of operations and financial condition.

In order to enhance the regulation of insurer solvency, a Risk Based Capital, or RBC, formula was adopted by the U.S. National Association of Insurance Commissioners, or NAIC, for U.S. insurance companies. State insurance regulators monitor the financial status of an insurer by reviewing the insurer's compliance with RBC requirements. The provinces in which we operate in Canada also have solvency requirements and use the Minimum Capital Test or MCT ratio as their benchmark. If our insurance subsidiaries do not comply with these minimum capital requirements, they may be restricted or prohibited from operating. If our insurance subsidiaries are required to increase their reserves in the future, as a result of unexpectedly poor claims experience or otherwise, they may violate these minimum capital requirements unless we are able to take actions to improve the solvency of those subsidiaries. As a result, our business, results of operations, and financial condition may be materially adversely affected.

We believe that our insurance and reinsurance subsidiaries are in compliance with applicable regulatory requirements in all material respects. It is not possible to predict the future impact of changing federal, state and provincial regulation on our operations, and there can be no assurance that laws and regulations enacted in the future will not be more restrictive than existing laws and regulations.

Our business could be adversely affected as a result of changing political, regulatory, economic or other influences.

The insurance industry is subject to changing political, economic and regulatory influences. These factors affect the practices and operation of insurance and reinsurance organizations. Legislatures in Canada, the United States, Barbados, Bermuda and local jurisdictions in which we operate have periodically considered programs to reform or amend their respective insurance and reinsurance systems. Recently, the insurance and reinsurance regulatory framework has been subject to increased scrutiny in many jurisdictions.

Changes in current insurance regulation may include increased governmental involvement in the insurance industry and initiatives aimed at premium controls, or may otherwise change the business and economic environment in which insurance industry participants operate. Historically, the automobile insurance industry

has been under pressure from time to time from regulators, legislators or special interest groups to reduce, freeze or set rates at levels that are not necessarily related to underlying costs or risks, including initiatives to roll back automobile and other personal line rates. These changes may limit our ability to price automobile insurance adequately and could require us to discontinue unprofitable product lines, make unplanned modifications of our products and services, or may result in delays or cancellations of sales of our products and services. For example, a rate freeze in late 2003 and premium roll-back in 2004 were instituted in Alberta. As a result, we have purposely reduced our business in Alberta until market conditions improve. We did not notice any material changes in market conditions in Alberta in 2006. We cannot predict the future impact of changing laws or regulations on our operations and any changes could have a material adverse effect on our results of operations or financial condition.

Our business may be materially adversely affected if the tax laws of the United States or Canada change or relevant tax authorities successfully challenge our interpretations of these laws.

We operate wholly owned subsidiary reinsurance companies in Barbados and Bermuda for the sole purpose of reinsuring risks from our own subsidiaries. Legislation was proposed in 2002 which would have disallowed a deduction for U.S. income tax purposes for premiums paid to certain specified related reinsurers. If this or similar legislation were to be enacted, this could have the effect of increasing the taxes payable by us or certain of our subsidiaries. We cannot assure you that any such legislation or similar legislation will not be enacted.

Due to our corporate structure and to differences in the tax laws of the United States and Canada, we deduct interest paid on certain debt in the United States as well as in Canada. Such deductions are based on our interpretation of applicable tax laws. There is no guarantee that the Internal Revenue Service or any other tax authority will not challenge our interpretation, and if such a challenge were made and were successful, the taxes payable by us or certain of our subsidiaries could be increased. In addition, amendments or changes in applicable income tax laws or regulations, including those arising from judicial decisions or administrative pronouncements, could deny a deduction for interest to taxpayers with a structure similar to ours.

We may not be able to realize our investment objectives, which could significantly reduce our net income.

We depend on income from our investment portfolio for a substantial portion of our earnings. In 2004, 2005, and 2006, net investment income and net realized capital gains accounted for approximately 5.1%, 6.8% and 7.8%, respectively, of our consolidated revenue. A significant decline in investment yields in our investment portfolio or an impairment of securities that we own could have a material adverse effect on our business, results of operations and financial condition. We currently maintain and intend to continue to maintain an investment portfolio comprising primarily fixed income securities. As of December 31, 2006, the fair value of our investment portfolio included \$2.48 billion of fixed income securities. For 2004, 2005 and 2006, the change in net unrealized gains in our portfolio reflected an increase of \$20.1 million, a decrease of \$43.1 million and an increase of \$8.3 million, respectively. Due to fluctuations in the yields on fixed income securities, we face reinvestment risk as these securities mature because the funds may be reinvested at rates lower than that of the maturing security.

Our ability to achieve our investment objectives is affected by general economic conditions that are beyond our control. General economic conditions can adversely affect the markets for interest rate sensitive securities, including the extent and timing of investor participation in such markets, the level and volatility of interest rates and, consequently, the value of fixed income securities. In addition, changing economic conditions can result in increased defaults by the issuers of securities that we own. Interest rates are highly sensitive to many factors, including monetary policies, domestic and international economic and political conditions and other factors beyond our control.

General economic conditions, stock market conditions and many other factors can also adversely affect the securities markets and, consequently, the value of the securities we own. We may not be able to realize our investment objectives, which could reduce our net income significantly.

We derive the majority of .our premiums from a few geographic areas, which may cause our business to be affected by catastrophic losses or business conditions in these areas.

Despite our wide North American market span, some jurisdictions including Illinois, Florida, Ontario and California generate a significant percentage of premiums.

Our results of operations may, therefore, be adversely affected by any catastrophic losses in these areas. Catastrophic losses can be caused by a wide variety of events, including earthquakes, hurricanes, tropical storms, tornadoes, wind, ice storms, hail, fires, terrorism, riots and explosions, and their incidence and severity are inherently unpredictable. Catastrophic losses are characterized by low frequency but high severity due to aggregation of losses, and could result in adverse effects on our results of operations or financial condition. Our results of operations may also be adversely affected by general economic conditions, competition, regulatory actions or other business conditions that affect losses or business conditions in the areas in which we do business.

If reinsurance rates rise significantly or reinsurance becomes unavailable or reinsurers are unable to pay our claims, we may be adversely affected.

We purchase reinsurance from third parties in order to reduce our liability on individual risks. Reinsurance does not relieve us of our primary liability to our insureds. A third party reinsurer's insolvency or inability or unwillingness to make payments under the terms of a reinsurance treaty could have a material adverse effect on our financial condition or results of operations. As of December 31, 2006, we had \$208.1 million recoverable from third party reinsurers and other insurers. The majority of these recoverables are unsecured.

The amount and cost of reinsurance available to our insurance companies are subject, in large part, to prevailing market conditions beyond our control. Our ability to provide insurance at competitive premium rates and coverage limits on a continuing basis depends in part upon the extent to which we can obtain adequate reinsurance in amounts and at rates that will not adversely affect our competitive position. We cannot assure you that we will be able to maintain our current reinsurance facilities, which generally are subject to annual renewal. If we are unable to renew any of these facilities upon their expiration or to obtain other reinsurance facilities in adequate amounts and at favourable rates, we may need to modify our underwriting practices or reduce our underwriting commitments.

Kingsway Financial is a holding company and its operating subsidiaries are subject to dividend restrictions.

Kingsway Financial is an insurance holding company with assets consisting primarily of the capital stock of its subsidiaries. Our operations are and will continue to be

limited by the earnings of our subsidiaries and the distribution or other payment of such earnings to us in the form of dividends, loans, advances or the reimbursement of expenses. The payment of dividends, the making of loans and advances or the reimbursement of expenses to us by our subsidiaries is contingent upon the earnings of those subsidiaries and is subject to various business considerations. In addition, payments of dividends to us by our insurance and reinsurance subsidiaries are subject to various statutory and regulatory restrictions imposed by the insurance laws of the domiciliary jurisdiction of such subsidiaries, including Barbados and Bermuda. For the year 2007, under these insurance regulatory restrictions, based on our December 31, 2006 financial statements, our insurance and reinsurance subsidiaries would have aggregate dividend capacity of \$515.9 million. In most jurisdictions payment of dividends is subject to prior regulatory approval. The inability of our subsidiaries to pay dividends to us could have a material adverse effect on our business and financial condition.

Our business depends upon key employees, and if we are unable to retain the services of these key employees or to attract and retain additional qualified personnel, our business may suffer.

We are dependent on a number of key employees. Our success has been, and will continue to be, dependent on our ability to retain the services of our existing key employees and to attract and retain additional qualified personnel in the future. The loss of the services of any of our key employees, or the inability to identify, hire and retain other highly qualified personnel in the future, could adversely affect the quality and profitability of our business operations. There are no employment contracts in place for any of our executives.

Various factors may inhibit potential acquisition bids that could be beneficial to our shareholders.

Regulatory provisions may delay, defer or prevent a takeover attempt that shareholders may consider in their best interest. For example, under the terms of applicable U.S. state statutes, any person or entity desiring to purchase more than a specified percentage (commonly 10%) of our outstanding voting securities is required to obtain regulatory approval prior to its purchase of our shares. These requirements would generally require a potential bidder to obtain the prior approval by the insurance departments of the states in which our U.S. subsidiaries are domiciled and may require pre-acquisition notification in states that have adopted pre-acquisition

notification provisions. Obtaining these approvals could result in material delays or deter any such transaction.

Regulatory requirements could make a potential acquisition of our company more difficult and may prevent shareholders from receiving the benefit from any premium over the market price of our common shares offered by a bidder in a takeover context. Even in the absence of a takeover attempt, the existence of these provisions may adversely affect the prevailing market price of our common shares if they are viewed as discouraging takeover attempts in the future.

In addition, the Shareholder Rights Plan approved by our shareholders may also have anti-takeover effects. Our Shareholders Rights Plan is designed to protect our shareholders in the event of unsolicited offers to acquire us, and other coercive takeover tactics which, in the opinion of our board of directors, could impair its ability to represent shareholder interests. The provisions of our Shareholder Rights Plan may render an unsolicited takeover more difficult or less likely to occur or might prevent such a takeover, even though such takeover may offer our shareholders the opportunity to sell their shares at a price above the prevailing market price.

Fluctuations in currency exchange rates could negatively affect our results.

Effective December 31, 2005 we prepared our consolidated financial statements in U.S. dollars. In 2006, 31% of our premiums came from our Canadian operations and are currently denominated in Canadian dollars. Therefore, fluctuations in the U.S. to Canadian dollar exchange rate will impact our results of operations and financial condition from period to period. However, the reporting volatility has been reduced due to the larger portion of our operations conducting its business in our reporting currency, U.S. dollars.

Our Canadian insurance operations generally write policies denominated in Canadian dollars and invest in Canadian dollars. Our U.S. operations generally write policies denominated in U.S. dollars and invest in U.S. dollars. Although investing in local currencies limits the effect of currency exchange rate fluctuations on local operating results, fluctuations in such rates could affect our operations or results, and do affect the translation of these results into U.S. dollars in our consolidated financial statements. During 2006, our shareholders' equity was reduced by \$2.9 million as a result of the currency translation adjustment of our Canadian dollar denominated assets into U.S. dollars.

Report of Independent Registered Public Accounting Firm

To the Shareholders and Board of Directors of Kingsway Financial Services Inc.:

We have audited management's assessment, included in the accompanying Management's Report on Internal Control over Financial Reporting, that Kingsway Financial Services Inc. (the "Company") maintained effective internal control over financial reporting as of December 31, 2006, based on the criteria established in the *Internal Control – Integrated Framework*, issued by the committee of Sponsoring Organizations of the Treadway Commission ("COSO"). The Company's management is responsible for maintaining effective internal control over financial reporting and for its assessment of the effectiveness of internal control over financial reporting. Our responsibility is to express an opinion on management's assessment and opinion on the effectiveness of the Company's internal control over financial reporting based on our audit.

We conducted our audit in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform an audit to obtain reasonable assurance whether effective internal control over financial reporting was maintained in all material respects. Our audit included obtaining an understanding of internal control over financial reporting, evaluating management's assessment, testing and evaluating the design and operating effectiveness of internal control, and performing such other procedures as we considered necessary in the circumstances. We believe that our audit provides a reasonable basis for our opinion.

A company's internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with Canadian generally accepted accounting principles, including a reconciliation to United States generally accepted accounting principles. A company's internal control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and disposition of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with

generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use or disposition of the company's asset that could have a material effect on its financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluations of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

In our opinion, management's assessment that the Company maintained effective internal control over financial reporting as of December 31, 2006, is fairly stated, in all material respects, based on the criteria established in *Internal Control – Integrated Framework*, issued by COSO. Also in our opinion the Company maintained, in all material respects, effective internal control over financial reporting as of December 31, 2006, based on the criteria established in the *Internal Control – Integrated Framework*, issued by COSO.

We have also conducted our audits on the consolidated financial statements in accordance with Canadian generally accepted auditing standards. With respect to the consolidated financial statements for the year ended December 31, 2006, we have also conducted our audit in accordance with the standards of the Public Company Accounting Oversight Board (United States). Our report dated March 30, 2007, expressed an unqualified opinion on those consolidated financial statements.

Chartered Accountants

Toronto, Canada
March 30, 2007

Role of the Actuary

With respect to the preparation of these financial statements, management prepares a valuation, including the selection of appropriate assumptions, of the Company's obligations at the balance sheet date under insurance policies issued by its subsidiaries. With respect to the preparation of these financial statements, the independent actuary, Pierre Laurin of Tillinghast, a business of Towers Perrin Inc., carries out a review of management's valuation of the unpaid claim liabilities and provides an opinion to the Board of Directors regarding the appropriateness of the unpaid claim liabilities recorded by management to meet all policyholder claim obligations of the Company at the balance sheet date. The work to form that opinion includes an examination of the sufficiency and reliability of data, and review of the valuation process used by management. The independent actuary is responsible for assessing whether the assumptions and methods used for the valuation of policy liabilities are in accordance with accepted actuarial practice, applicable legislation, and associated regulations and directives. In performing the review of these liabilities

determined by management, which are by their very nature inherently variable, the actuary makes assumptions as to future loss ratios, trends, reinsurance recoveries, expenses and other contingencies, taking into consideration the circumstances of the Company and the nature of the insurance policies. In carrying out their work, the independent actuary makes use of the work of the external auditors with regards to data upon which their calculations are based.

The valuation is based on projections of future claims and claim adjustment expenses on claims incurred at the balance sheet date. It is certain that actual future claims and claim adjustment expenses will not develop exactly as projected and may, in fact, vary significantly from the projections. Further, the projections make no provision for new classes or claim categories not sufficiently recognized in the claims database.

Management is responsible for the accuracy and completeness of the underlying data used in the valuation. The actuary's report outlines the scope of the review and the opinion.

Role of the Auditor

The independent registered public accounting firm, KPMG LLP, has been appointed by the audit committee and ratified by the shareholders. Their responsibility is to conduct an independent and objective audit of the financial statements in accordance with Canadian generally accepted auditing standards and in 2006 the standards of the Public Company Accounting Oversight Board (United States) and to report thereon to the

shareholders. In carrying out their audit procedures relating to the claims liabilities, the auditors make use of the work and report of the independent actuary. The shareholders' auditors have full and unrestricted access to the Board of Directors and the Audit Committee to discuss audit, financial reporting and related findings. The auditors' report outlines the scope of their audit and their opinion.

Notes to Consolidated Financial Statements

(Tabular amounts in thousands of U.S. dollars, except for per share amounts)

Kingsway Financial Services Inc. (the "Company") was incorporated under the Business Corporations Act (Ontario) on September 19, 1989. The Company is a financial services holding company which, through its subsidiaries in Canada, United States, Barbados and Bermuda, is engaged in property and casualty insurance.

1. Summary of significant accounting policies:

(a) Principles of consolidation:

The consolidated financial statements include the accounts of the Company and its subsidiaries. Acquisitions are accounted for by the purchase method, whereby the results of acquired companies are included only from the date of acquisition, and divestitures are included up to the date of disposal. Assets and liabilities of the acquired companies are included in the financial statements at their fair values at the date of acquisition. The Company holds interests in variable interest entities that are not included in the consolidated financial statements which are more fully described in note 14.

The following is a list of our material subsidiaries, all of which are 100% owned, directly or indirectly, (except for qualifying shares of York Fire & Casualty Insurance Company and Kingsway General Insurance Company held by directors in order to satisfy applicable statutory requirements), with the jurisdiction of incorporation indicated in brackets:

American Country Holdings Inc. (Illinois); American Country Insurance Company (Illinois); American Country Financial Services Corp. (Illinois); American Country Underwriting Agency Inc. (Illinois); American Country Professional Services Corp. (Illinois); American Service Investment Corporation (Illinois); American Service Insurance Company, Inc. (Illinois); ARK Insurance Agency Inc. (Illinois); Avalon Risk Management, Inc. (Illinois); Appco Finance Corporation (Florida); Appco SPV L.L.C. (Florida); Auto Body Tech Inc. (Florida); Funding Plus of America (Alabama); Hamilton Risk Management Company (Florida); HI Holdings, Inc. (Hawaii); Insurance Management Services Inc. (Florida); U.S. Security Insurance Company (Florida); Jevco Insurance Company (Canada); Kingsway America Inc. (Delaware); Kingsway Nova Scotia Finance, ULC (Nova Scotia); Kingsway General Insurance Company (Ontario); Kingsway Reinsurance (Bermuda) Ltd. (Bermuda); Kingsway Reinsurance Corporation (Barbados); Kingsway U.S. Finance Partnership (Delaware); Kingsway U.S. Tier II Finance Partnership (Delaware); Southern United Holding, Inc. (Alabama); Southern United Fire Insurance Company (Alabama); Southern United General Agency of Texas, Inc. (Texas); UCC Corporation (Nevada); Universal Casualty Company (Illinois); Walshire Assurance Company (Pennsylvania); Lincoln General Insurance Company (Pennsylvania); York Fire & Casualty Insurance Company (Ontario); Zephyr Insurance Company (Hawaii); and RPC Insurance Agency L.L.C. (Delaware).

(b) Use of estimates:

The preparation of financial statements requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the year. Actual results could differ from these estimates and changes in estimates are recorded in the accounting period in which they are determined.

(c) Investments:

Fixed term investments are carried at amortized cost providing for the amortization of the discount or premium on a constant yield basis to maturity. Investments in common and preferred shares are carried at cost. Where a decline in value of an investment is considered to be other than temporary a write-down of the investment is recorded.

(d) Investment income:

Investment income is recorded as it accrues. Dividend income on common and preferred shares is recorded on the ex-dividend date. Gains and losses on disposal of investments are determined and recorded as at the trade date, and are calculated on the basis of average cost.

(e) Cash and cash equivalents:

Cash and cash equivalents includes cash and securities with maturities of less than thirty days.

(f) Goodwill and other intangible assets:

When the Company acquires a subsidiary or other business where it exerts significant influence, the fair value of the net tangible and intangible assets acquired is determined and compared to the amount paid for the subsidiary or business acquired. Any excess of the amount paid over the fair value of those net assets is considered to be goodwill.

Goodwill is tested at least annually for impairment to ensure that its fair value is greater than or equal to the carrying value. Any excess of carrying value over fair value is charged to income in the period in which the impairment is determined. At December 31, 2006 and 2005, the carrying value of goodwill was \$69,030,000 and \$68,880,000, respectively (note 11 (b) & 11 (c)).

When the Company acquires a subsidiary or other business where it exerts significant influence or acquires certain assets, intangible assets may be acquired, which are recorded at their fair value at the time of the acquisition. Intangible assets with a definite useful life are amortized to income on a straight line basis over its defined useful life. The Company writes down the value of an intangible asset with a definite useful life when the undiscounted cash flows are not expected to allow for full recovery of the carrying value. At December 31, 2006 and 2005 intangible assets with a definite useful life, net of accumulated amortization, were \$19,570,000 and \$nil, respectively.

Intangible assets with an indefinite useful life are not subject to amortization and are tested at least annually for impairment to ensure that its fair value is greater than or equal to its carrying value. Any excess of carrying value over fair value is charged to income in the period in which the impairment is determined. At December 31, 2006 and 2005 the Company had intangible assets with an indefinite life, net of accumulated depreciation of \$2,250,000 and \$2,250,000, respectively.

Amortization of intangible assets reported in the Consolidated Statements of Operations for the years ended December 31, 2006, 2005 and 2004 was \$1,030,000, \$795,000 and \$530,000, respectively. There were no write-downs of goodwill or intangible assets due to impairment during the years ended December 31, 2006, 2005, and 2004.

(g) Deferred policy acquisition costs:

The Company defers brokers' commissions, premium taxes and other underwriting and marketing costs relating to the acquisition of premiums written to the extent they are considered recoverable. These costs are then expensed as the related premiums are earned. The method followed in determining the deferred policy acquisition costs limits the deferral to its realizable value by giving consideration to estimated future claims and expenses to be incurred as premiums are earned. Changes in estimates, if any, are recorded in the accounting period in which they are determined. Anticipated investment income is included in determining the realizable value of the deferred policy acquisition costs.

(h) Premium revenue and unearned premiums:

The Company earns premium revenue over the period covered by each individual insurance contract in proportion to the insurance protection provided. For motorcycle premiums, a higher percentage of the premiums are earned during the summer months, which is the motorcycle riding season in Canada. For all other lines of business, the premiums are earned evenly over the contract period. Unearned premiums represent the portion of premiums written related to the unexpired risk portion of the policy at the year end.

The reinsurers' share of unearned premiums is recognized as amounts recoverable using principles consistent with the Company's method for determining the unearned premium liability.

Notes to Consolidated Financial Statements

(Tabular amounts in thousands of U.S. dollars, except for per share amounts)

A significant portion of the Company's revenue is subject to regulatory approvals. In Canada, automobile insurance premium rates other than for fleet automobiles are regulated by the provincial government authorities. In the United States, property and casualty insurance premium rates are subject to regulation by state government authorities. Regulation of premium rates is based on claims and other costs of providing insurance coverage. Regulatory approvals can limit or reduce premium rates that can be charged, or delay the implementation of changes in rates.

(i) Unpaid claims:

The provision for unpaid claims includes adjustment expenses and represents an estimate for the full amount of all expected costs, including investigation, and the projected final settlements of claims incurred on or before the balance sheet date. The provision does not take into consideration the time value of money or make an explicit provision for adverse deviation.

These estimates of future loss activity are necessarily subject to uncertainty and are selected from a wide range of possible outcomes. All provisions are periodically reviewed and evaluated in the light of emerging claim experience and changing circumstances. The resulting changes in estimates of the ultimate liability are recorded as incurred claims in the accounting period in which they are determined.

(j) Reinsurance:

Net premiums earned and claims incurred are recorded net of amounts ceded to, and recoverable from, reinsurers. Estimates of amounts recoverable from reinsurers on unpaid claims are recorded separately from estimated amounts payable to policyholders. Unearned premiums are also reported before reduction for business ceded to reinsurers and the reinsurers' portion is classified with amounts due from reinsurers.

Amounts recoverable from reinsurers are estimated and recognized in a manner consistent with the Company's method for determining the related policy liability associated with the reinsured policy.

(k) Translation of foreign currencies:

The consolidated financial statements have been presented in U.S. dollars as the Company's principal investments and cash flows are influenced primarily by the U.S. dollar. The operations of its subsidiaries in Canada, Bermuda and its head office operations are self sustaining. Assets and liabilities of non U.S. dollar denominated subsidiaries are translated at year end rates of exchange. Revenue and expenses are translated at the average rate of exchange for the year. The net unrealized gains or losses which result from translation are deferred and included in shareholders' equity under the caption "currency translation adjustment". The currency translation adjustment will change with fluctuations in the Canadian to U.S. dollar exchange rate.

All amounts expressed in the financial statements are in U.S. dollars unless otherwise noted.

(l) Income taxes:

The Company follows the asset and liability method of accounting for income taxes, whereby future tax assets and liabilities are recognized for the future tax consequences attributable to differences between the financial statement carrying amount of existing assets and liabilities and their respective tax bases and operating loss and tax credit carryforwards. Future tax assets and liabilities are measured using enacted or substantively enacted tax rates expected to apply to taxable income in the years in which those temporary differences are expected to be recovered or settled. The effect on future tax assets and liabilities of a change in tax rates is recognized in income in the period that includes the date of enactment or substantive enactment.

(m) Stock-based compensation plan:

The Company has a stock-based compensation plan which is described in note 6. The Company uses the fair-value method of accounting for stock-based compensation awards granted to employees and non-employee directors for options granted on or after January 1, 2003. The Company determines the fair value of the stock options on their grant date using the

Black-Scholes option pricing model and records the fair value as a compensation expense over the period that the stock options vest, with a corresponding increase to contributed surplus. When these stock options are exercised, the amount of proceeds, together with the amount recorded in contributed surplus, is recorded in share capital.

No compensation expense is recognized for stock options granted prior to January 1, 2003. The consideration paid by employees and non-employee directors on exercise of these stock options is credited to share capital.

During 2006 the Company adopted the recommendation by EIC 162 for stock-based compensation for employees eligible to retire before the vesting date. The additional stock compensation expense relating to eligible employees in 2006 was \$648,000.

(n) Capital assets:

Capital assets are reported in the financial statements at amortized cost. Amortization of capital assets has been provided by the straight-line method over the estimated useful lives of such assets. The useful lives range from 10 to 40 years for buildings, 3 to 39 years for leasehold improvements, 3 to 10 years for furniture and equipment, 3 to 5 years for computers and software development, and 3 to 5 years for automobiles.

2. Future change in accounting policy:

In April 2005, the CICA issued three new standards to be applied prospectively, Section 3855 Financial Instruments – Recognition and Measurement, Section 3865 Hedges and Section 1530 Comprehensive Income, effective for years starting on or after October 1, 2006. The Company will adopt these standards on January 1, 2007.

The new rules will require the Company to classify all financial instruments as held for trading, held to maturity, available for sale or as loans and receivables.

The majority of the Company's financial instruments will be classified as available for sale and be reported on the financial statements at fair value, with the changes in the unrealized gains or losses reported in a new component of shareholders' equity called other comprehensive income. The remainder will be classified as either loans or receivables which will continue to be carried at amortized cost or as held for trading and will be carried at fair market value with the changes in unrealized gains or losses reported in net income.

The effect of the adoption of the new standards on the balance sheet at January 1, 2007 will be to increase shareholder's equity by \$26.5 million.

3. Investments:

The carrying amounts and fair values of investments are summarized below:

	December 31, 2006			
	Carrying Amount	Gross Unrealized Gains	Gross Unrealized Losses	Fair Value
Term deposits	\$ 379,574	\$ 45	\$ 491	\$ 379,128
Bonds:				
Canadian - Government	221,457	2,585	292	223,750
- Corporate	339,575	5,603	699	344,479

Common shares				
- Canadian	182,326	28,927	11,888	199,365
- U.S.	184,376	23,942	3,490	204,828
Financed premiums	67,528	-	-	67,528
	\$ 2,929,090	\$ 66,747	\$ 40,277	\$ 2,955,560

Notes to Consolidated Financial Statements

(Tabular amounts in thousands of U.S. dollars, except for per share amounts)

The maturity profile of the bonds and term deposits investments at their carrying amounts and fair values as at December 31, 2006 is as follows:

	Carrying Amount	Fair Value
Due in one year or less	\$ 602,114	\$ 600,024
Due in one year through five years	1,168,583	1,157,516
Due after five years through ten years	587,862	590,922
Due after ten years	136,301	135,377
	\$ 2,494,860	\$ 2,483,839

The carrying amounts and fair values of investments are summarized as follows:

December 31, 2005				
	Carrying Amount	Gross Unrealized Gains	Gross Unrealized Losses	Fair Value
Term deposits	\$ 383,071	\$ 10	\$ 1,347	\$ 381,734
Bonds:				
Canadian - Government	199,500	3,432	276	202,656
- Corporate	279,953	6,558	756	285,755
U.S. - Government	144,835	374	2,092	143,117
- Corporate	1,122,624	1,831	24,425	1,100,030
Other - Government	83,981	43	1,996	82,028
- Corporate	179,002	89	3,433	175,658
Sub-total	\$ 2,392,966	\$ 12,337	\$ 34,325	\$ 2,370,978
Preferred shares				
- Canadian	1,290	62	-	1,352
Common shares				
- Canadian	152,347	32,522	6,127	178,742
- U.S.	171,483	19,087	5,357	185,213
Financed premiums	85,704	-	-	85,704
	\$ 2,803,790	\$ 64,008	\$ 45,809	\$ 2,821,989

The maturity profile of the bonds and term deposits investments at their carrying amounts and fair values as at December 31, 2005 is as follows:

	Carrying Amount	Fair Value
Due in one year or less	\$ 717,729	\$ 712,709
Due in one year through five years	1,075,914	1,057,350
Due after five years through ten years	465,112	467,484
Due after ten years	134,211	133,435
	\$ 2,392,966	\$ 2,370,978

The amounts are shown by contractual maturity. Actual maturity may differ from contractual maturity because certain borrowers have the right to call or repay certain obligations with or without call or prepayment penalties.

The following tables highlight the aggregate unrealized loss position, by security type, of holdings in an unrealized loss position as at December 31, 2006 and 2005. The tables segregate the holdings based on the period of time the securities have been continuously held in an unrealized loss position.

December 31, 2006

Fair values of term deposits, bonds and common and preferred shares are measured using approximate quoted market values based on the latest bid prices. Financed premiums represent the portion of the insured's monthly premium payments that are not yet due. Certain insureds have the option to pay a portion of the premium when the policy is placed in force and the balance in monthly instalments. The insured pays an additional premium for this option, reflecting handling costs and the investment income that would have been earned on such premium, had the total amount been collected at the beginning of the policy period. The additional premium is essentially an interest payment on the balance of the unpaid premium and is recognized as investment income over the period of the policy. The fair value of financed premiums, which are realized over the term of the related policies of up to one year, approximates their carrying amount.

Management has reviewed currently available information regarding those investments whose estimated fair value is less than their carrying amount and ascertained that the carrying amounts are expected to be recovered. Debt securities whose carrying amount exceeds fair value can be held until maturity when management expects to receive the principal amount. Principally, unrealized losses on debt securities have arisen due to increases in market interest rates rather than deteriorating creditworthiness of the issuers.

Notes to Consolidated Financial Statements

(Tabular amounts in thousands of U.S. dollars, except for per share amounts)

Management performs a quarterly analysis of the Company's investment holdings to determine if declines in market value are other than temporary. The analysis includes some or all of the following procedures as deemed appropriate by management:

- identifying all security holdings in an unrealized loss position that has existed for at least six months or other circumstances which management believes may impact the recoverability of the security;
- obtaining a valuation analysis from third party investment managers regarding the intrinsic value of these holdings based on their knowledge, experience and other market based valuation techniques;
- reviewing the trading range of certain securities over the preceding calendar period;
- assessing if declines in market value are other than temporary for debt security holdings based on the investment grade credit rating from third party security rating agencies;
- assessing if declines in market value are other than temporary for any debt security holding with non-investment grade credit rating based on the continuity of their debt service record; and
- determining the necessary provision for declines in market value that are considered other than temporary based on the analyses performed.

The risks and uncertainties inherent in the assessment methodology utilized to determine declines in market value that are other than temporary include, but may not be limited to, the following:

- the opinion of professional investment managers could be incorrect;
- the past trading patterns of individual securities may not reflect future valuation trends;
- the credit ratings assigned by independent credit rating agencies may be incorrect due to unforeseen or unknown facts related to a company's financial situation; and
- the debt service pattern of non-investment grade securities may not reflect future debt service capabilities and may not reflect the company's unknown underlying financial problems.

The length of time securities may be held in an unrealized loss position may vary based on the opinion of the appointed investment managers and their respective analyses related to valuation and the various credit risks that may prevent the Company from recapturing the principal investment. If the appointed investment manager determines there is little or no risk of default prior to the maturity of a holding, the Company would elect to hold the security in an unrealized loss position until the price recovers or the security matures.

In situations where facts emerge that might increase the risk associated with recapture of principal, securities would be traded and losses realized. Due to the current volatility of the equity markets, the Company believes there are a number of securities currently trading at values below their respective intrinsic values based on historical valuation measures. In these situations, holdings may be maintained in an unrealized loss position for different periods of time based on the underlying economic assumptions influencing the investment manager's valuation of the holding. In cases where the economic realities divert from the underlying assumptions driving the investment manager's valuation, securities would be traded and losses realized. In cases where the economic assumptions coincide with valuation assumptions, the holding would be maintained until the market value of the security recovers in the public markets.

All of the Company's fixed term investments have fixed interest rates. The coupon rates for the Company's fixed term investments range from 2.25% to 11.00% at December 31, 2006 and 1.50% to 12.00% at December 31, 2005.

The Company limits its investment concentration in any one investee or related group of investees other than government issues, to less than 5% of the Company's investments.

Net investment income for the years ended December 31 is comprised as follows:

	2006	2005	2004
Investment income:			
Interest on short-term investments	\$ 17,547	\$ 9,881	\$ 6,335
Interest on bonds	90,826	73,615	56,114
Dividends	12,026	8,939	5,707
Premium finance	5,836	7,059	8,614
Other	2,258	1,447	2,309
Gross investment income	128,493	100,941	79,079
Investment expenses	7,622	7,906	4,813
Net investment income	\$ 120,871	\$ 93,035	\$ 74,226

Net realized gains for the years ended December 31, 2006, 2005, and 2004 were \$28,987,000, \$38,239,000 and \$20,392,000, respectively. Included in net realized gains were adjustments to the carrying value of investments for declines in market value considered other than temporary of \$4,582,000, \$4,806,000 and \$1,291,000 for the years ended December 31, 2006, 2005 and 2004, respectively.

As at December 31, 2006, bonds and term deposits with an estimated fair value of \$40,260,000 (2005 - \$34,392,000) were on deposit with regulatory authorities.

4. Capital assets:

	Cost	Accumulated Amortization	2006 Carrying Value

*Weighted average price is stated in Canadian dollars as per the terms of the option.

- (a) During the year ended December 31, 2006, options to acquire 209,072 shares (2005 – 270,203; 2004 – 380,456 shares) were exercised at prices from C\$4.30 to C\$19.70 per share (2005 - C\$4.30 to C\$19.66 per share; 2004 - C\$4.30 to C\$15.19 per share).
- (b) The weighted average number of shares outstanding for the years ended December 31, 2006, 2005 and 2004 were 56,233,964, 56,423,207 and 56,123,976, respectively. On a diluted basis, the weighted average number of shares outstanding for the years ended December 31, 2006, 2005 and 2004 were 56,868,785, 56,962,868 and 56,549,496, respectively.
- (c) During 2006, the Company declared dividends payable in Canadian dollars of C\$0.0625 per share payable for the first three quarters and C\$0.075 per share for the last quarter. Total dividends declared in 2006 were C\$0.2625 per common share. Dividends paid to common shareholders during 2006 were C\$14,749,872 and C\$11,291,300 in 2005.
- (d) Options exercised during the year resulted in an increase in share capital from contributed surplus of \$400,000 for the year ended December 31, 2006 and \$415,000 for the year ended December 31, 2005.
- (e) On November 8, 2005 the Company obtained approval from the Toronto Stock Exchange to make a normal course issuer bid for its common shares. For the twelve month period ending November 7, 2006 the Company repurchased 562,800 of its common shares at an average price of \$19.66.
- (f) On November 9, 2006 the Company obtained approval from the Toronto Stock Exchange to make a normal course issuer bid for its common shares. For the twelve month period ending November 8, 2007 the Company may repurchase up to 2,800,000 shares in total representing approximately 5%

of the outstanding common shares. For the period of November 9, 2006 to December 31, 2006, the Company had repurchased 242,200 of its common shares at an average price of \$21.16. For the year ended December 31, 2006 the Company had repurchased a total of 805,000 of its common shares at an average price of \$20.11.

6. Stock-based compensation:

- (a) The Company has established a stock option incentive plan for directors, officers and key employees of the Company and its subsidiaries. At December 31, 2006, the maximum number of common shares that may be issued under the plan is 4,800,000 (2005 – 4,800,000) common shares. The maximum number of common shares available for issuance to any one person under the stock option plan is 5% of the common shares outstanding at the time of the grant. The exercise price is based on the market value of the shares at the time the option is granted. In general, the options vest evenly over a three year period and are exercisable for periods not exceeding 10 years.

The intrinsic value of a stock option grant is the difference between the current market price for the Company's common shares and the exercise price of the option. The aggregate intrinsic value for the stock options outstanding at December 31, 2006, 2005 and 2004 was C\$14.6 million, C\$15.4 million and C\$9.1 million, respectively. The aggregate intrinsic value for stock options exercisable at December 31, 2006, 2005 and 2004 was C\$11.9 million, C\$9.5 million and C\$5.8 million, respectively.

The following tables summarize information about stock options outstanding as at December 31, 2006, December 31, 2005 and December 31, 2004:

Exercise prices are stated in Canadian dollars as per the terms of the option.

December 31, 2006

	Exercise Price	Date of Grant	Expiry Date	Remaining Contractual Life (Years)	Number Outstanding	Number Exercisable	
C\$	24.55	13-Feb-06	13-Feb-11	4.1	603,850	-	
C\$	19.70	14-Feb-05	14-Feb-10	3.1	512,951	162,784	
C\$	15.19	12-Feb-04	12-Feb-09	2.1	365,737	224,237	
C\$	13.53	10-Feb-03	10-Feb-13	6.1	329,335	329,335	
C\$	19.66	21-Feb-02	21-Feb-12	5.2	306,000	306,000

C\$	13.53	10-Feb-03	10-Feb-13	7.1	394,505	248,672	
C\$	19.66	21-Feb-02	21-Feb-12	6.2	340,000	340,000	
C\$	7.80	22-Feb-01	22-Feb-11	5.2	146,170	146,170	
C\$	4.30	24-Feb-00	24-Feb-10	4.2	120,336	120,336	
				Total	4.9	1,967,515	985,515

Notes to Consolidated Financial Statements

(Tabular amounts in thousands of U.S. dollars, except for per share amounts)

December 31, 2004

	Exercise Price	Date of Grant	Expiry Date	Remaining Contractual Life (Years)	Number Outstanding	Number Exercisable
C\$	15.19	12-Feb-04	12-Feb-09	4.1	453,833	-
C\$	13.53	10-Feb-03	10-Feb-13	8.1	485,169	182,836
C\$	19.66	21-Feb-02	21-Feb-12	7.2	403,500	269,000
C\$	7.80	22-Feb-01	22-Feb-11	6.2	202,339	202,339
C\$	4.30	24-Feb-00	24-Feb-10	5.2	186,669	186,669
		Total		6.3	1,731,510	840,844

At December 31, 2006, 2005 and 2004 the number of options exercisable is 1,249,359, 985,515 and 840,844, respectively, with weighted average prices of C\$14.81, C\$13.89 and C\$12.06, respectively.

The Company determines the fair value of options granted using the Black-Scholes option pricing model. The per share fair value of options granted during 2006, 2005 and 2004 was C\$6.11, C\$3.58 and C\$3.79.

The Company does not record any compensation expense for stock options granted prior to 2003. When these stock options are exercised, the Company will include the amount of proceeds in share capital. The impact on net income and earnings per share if the Company had measured the compensation element of stock options granted based on the fair value on the date of grant on all outstanding stock options on their grant date is disclosed as follows:

	2006	2005	2004
Stock option expense included in employee compensation expense	\$ 2,515	\$ 1,883	\$ 1,242
Net income, as reported	\$ 123,309	\$ 135,008	\$ 101,014
Additional expense that would have been recorded if all outstanding stock options granted before January 1, 2003 had been expensed	-	68	1,452
Pro forma net income	\$ 123,309	\$ 134,940	\$ 99,562
Basic earnings per share			
As reported	\$ 2.19	\$ 2.39	\$ 1.80
Pro forma	2.19	2.39	1.77
Diluted earnings per share			
As reported	\$ 2.17	\$ 2.37	\$ 1.79
Pro forma	2.17	2.37	1.76

Stock option expense above is charged to earnings and is included as a separate component of Shareholders' Equity under the caption Contributed Surplus.

The fair value of the options granted was estimated at the date of grant using the Black-Scholes option pricing model with the following weighted average assumptions:

	2006	2005	2004
Risk-free interest rate	4.02%	3.53%	3.49%
Dividend yield	1.02%	0.9%	0.0%
Volatility of the expected market price of the Company's common shares	31.4%	22.5%	30.3%
Expected option life (in years)	3.5	3.9	4.7

The Black-Scholes option valuation model was developed for use in estimating fair value of traded options that have no vesting restrictions and are fully transferable. As the Company's employee stock options have characteristics significantly different from those of traded options, and because changes in the subjective input assumptions can materially affect the fair value estimate, in management's opinion, the above pro forma adjustments are not necessarily a reliable single measure of the fair value of the Company's employee stock options.

(b) The Company has an employee share purchase plan where qualifying employees can choose each year to have up to 5% of their annual base earnings withheld to purchase the Company's common shares. The Company matches one half of the employee contribution amount, and its contributions vest immediately. All contributions are used by the plan administrator to purchase common shares in the open market. The Company's contribution is expensed as paid and for the years ended December 31, 2006, 2005 and 2004 totalled \$727,000, \$553,000 and \$390,000, respectively.

7. Pension benefits:

The Company maintains a separate defined contribution pension plan in Canada and in the U.S. for all of its qualified employees including the employees of all subsidiaries. In Canada, qualifying employees can choose each year to have up to 5% of their annual base earnings subject to the maximum Registered Retirement Savings Plan ("RRSP") deduction limit, withheld to contribute to the applicable plan. The RRSP deduction limit is the lesser of 18% of earned income for the preceding year or C\$18,000, C\$16,500 and C\$15,500 for 2006, 2005, and 2004 respectively. The Company matches one half of the employee contribution amount, and its contributions vest immediately.

In the U.S., qualifying employees can choose to voluntarily contribute up to 60% of their annual earnings to an overall limitation of \$15,000 in 2006, \$14,000 in 2005 and \$13,000 in 2004. The Company matches 50% of the employee contribution amount each payroll period up to 5%. The contributions for the U.S. plan vest based on years of service with 100% vesting after five years of service. The Company's contribution is expensed as paid and for the years ended December 31, 2006, 2005 and 2004 totalled \$1,581,000, \$1,247,000 and \$1,058,000, respectively. All Company obligations to the plans were fully funded as of December 31, 2006.

Prior to December 31, 1997, substantially all salaried employees of the Company's subsidiary American Country were covered by a defined benefit pension plan sponsored by American Country. Effective December 31, 1997, upon resolution of its board of directors, the plan was frozen. The reported pension expense for American Country was \$104,000, \$113,000 and \$60,000 in 2006, 2005, and 2004 respectively.

8. Underwriting policy and reinsurance ceded:

In the normal course of business, the Company seeks to reduce the loss that may arise from catastrophe or other events that cause unfavourable underwriting results by reinsuring certain levels of risk, in various areas of exposure, with other insurers. The Company is not relieved of its primary obligation to the policyholder as a result of the reinsurance transaction.

Failure of reinsurers to honour their obligations could result in losses to the Company, consequently, the Company continually evaluates the financial condition of its reinsurers and monitors concentrations of credit risk to minimize its exposure to significant losses from reinsurer insolvency.

The Company follows the policy of underwriting and reinsuring contracts of insurance, which limits the Company's net exposure to the following maximum amounts:

Years ended December 31	2006	2005	2004
Property claims			
- Canadian operations	C\$ 1,000	C\$ 500	C\$ 500
- U.S. operations	\$ 500	\$ 500	\$ 500
Casualty claims			
- Canadian operations	C\$ 2,500	C\$ 2,500	C\$ 2,500
- U.S. operations	\$ 1,000	\$ 1,000	\$ 1,000

Notes to Consolidated Financial Statements

(Tabular amounts in thousands of U.S. dollars, except for per share amounts)

In addition, the Company has obtained catastrophe reinsurance protection which provides coverage in the event of a series of events. This reinsurance limits its net retained exposure and provides coverage up to certain maximum per occurrence amounts in excess of the retained loss other than catastrophe risks in Hawaii as follows:

Years ended December 31	2006	2005	2004
Canada			
- Retained loss	C\$ 5,000	C\$ 5,000	C\$ 5,000
- Maximum coverage	C\$ 145,000	C\$ 145,000	C\$ 45,000
United States			
- Retained loss	\$ 5,000	\$ 2,000	\$ 5,000
- Maximum coverage	\$ 20,000	\$ 18,000	\$ 45,000

On October 31, 2005, the Company acquired Zephyr Insurance Inc. ("Zephyr") in Hawaii. Zephyr is protected by a separate catastrophe reinsurance program under a 95% quota-share treaty and excess of loss treaty. Under this program Zephyr retains up to \$7,540,000 in net losses subject to a maximum cover of \$1,000,000,000.

During 2004, the Company entered into two quota-share contracts. The Company did not renew the quota share reinsurance treaties upon their expiry on April 1, 2005.

The unearned premium balance is affected by the reinsurance ceded as a portion of the unearned premium will be owed to the reinsurer as the premiums are earned in the subsequent periods. The amounts deducted for reinsurance ceded from net premiums earned, claims incurred and commissions and premium taxes for the years December 31, 2006, 2005 and 2004 were as follows:

	2006	2005	2004
Net premiums earned	\$ 127,274	\$ 123,715	\$ 213,135
Claims incurred	39,256	90,506	152,187
Commissions and premium taxes	29,018	34,498	54,435

The amount of assumed premiums written was \$86,211,000, \$141,799,000 and \$232,431,000 for the years ended December 31, 2006, 2005 and 2004, respectively. The amount of assumed premiums earned was \$93,091,000, \$142,831,000 and \$235,054,000 for the years ended December 31, 2006, 2005 and 2004, respectively.

9. Income taxes:

(a) The Company's provision for income taxes, compared to statutory rates is summarized as follows:

	2006	2005	2004
Provision for taxes at Canadian statutory marginal income tax rate	\$ 50,515	\$ 55,750	\$ 40,589
Non-taxable investment income	(398)	(1,812)	(1,117)
Foreign operations subject to different tax rate	(33,892)	(34,218)	(28,493)
Change in tax rates and other	320	(381)	380
Provision for income taxes	\$ 16,545	\$ 19,339	\$ 11,359

(b) The components of future income tax balances are as follows:

	2006	2005
Future income tax assets:		
Losses carried forward	\$ 33,398	\$ 10,924
Unpaid claims and unearned premiums	32,090	30,037
Investments	8,526	10,276
Share issue expenses	430	1,298
Contingent commission accruals	5,510	12,358
Other	39,631	5,565
Valuation allowance	(498)	(500)
Future income tax assets	119,087	69,958
Future income tax liabilities:		
Deferred policy acquisition costs	(39,313)	(7,943)
Investments	(525)	(791)
Guaranteed payments	(2,572)	(2,238)
Other	(1,465)	(1,047)
Future income tax liabilities	(43,875)	(12,019)
Net future income tax assets	\$ 75,212	\$ 57,939

(c) Amounts and expiration dates of the operating loss carryforwards are as follows:

	Year of net operating loss	Expiration date	Net operating loss
U.S. operations:	1995	2010	\$ 546
	1997	2012	1,284
	2000	2020	710
	2001	2021	14,936
	2002	2022	4,405
	2003	2023	891
	2004	2024	207
	2005	2025	282
	2006	2026	74,971

(d) The Company established valuation allowances of \$498,000 and \$500,000 for its gross future tax assets at December 31, 2006 and 2005, respectively. Based on the Company's expectations of adjusted taxable income, its ability to change its investment strategy, as well as reversing gross future tax liabilities, management believes it is more likely than not that the Company will fully realize the gross future tax assets, with the exception of its net operating losses. The valuation allowances are a result of the potential inability to utilize net operating losses before expiration.

10. Unpaid claims:

(a) Nature of unpaid claims:

The establishment of the estimated provision for unpaid claims is based on known facts and interpretation of circumstances and is therefore a complex and dynamic process influenced by a large variety of factors. These factors include the Company's experience with similar cases and historical trends involving claim payment patterns, loss payments, pending levels of unpaid claims, product mix or concentration, claims severity and claim frequency patterns.

Other factors include the continually evolving and changing regulatory and legal environment, actuarial studies, professional experience and expertise of the Company's claim departments' personnel and independent adjusters retained to handle individual claims, the quality of the data used for projection purposes, existing claims management practices including claims handling and settlement practices, the effect of inflationary trends on future claims settlement costs, court decisions, economic conditions and public attitudes. In addition, time can

Notes to Consolidated Financial Statements

(Tabular amounts in thousands of U.S. dollars, except for per share amounts)

be a critical part of the provision determination, since the longer the span between the incidence of a loss and the payment or settlement of the claims, the more variable the ultimate settlement amount can be. Accordingly, short tail claims such as property claims, tend to be more reasonably predictable than long tail claims, such as general liability and automobile accident benefit claims that are less predictable.

Consequently, the process of establishing the estimated provision for unpaid claims is complex and imprecise as it relies on the judgement and opinions of a large number of individuals, on historical precedent and trends, on prevailing legal, economic, social and regulatory trends and on expectations as to future developments. The process of determining the provision necessarily involves risks that the actual results will deviate, perhaps substantially, from the best estimates made.

(b) Provision for unpaid claims:

The Company's annual evaluation of the adequacy of unpaid claims includes a re-estimation of the liability for unpaid claims relating to each preceding financial year compared to the liability that was originally established. The results of this comparison and the changes in the provision for unpaid claims, net of amounts recoverable from reinsurers, for the years ended December 31, 2006, 2005 and 2004 were as follows:

	2006	2005	2004
Unpaid claims - beginning of year - net	\$ 1,662,551	\$ 1,463,280	\$ 1,188,610
Provision for claims occurring:			
In the current year	1,193,288	1,217,952	1,220,604
In prior years	64,329	24,233	53,196
Claims paid during the year relating to:			
The current year	(409,236)	(424,997)	(446,230)
The prior years	(745,286)	(674,373)	(582,869)
Claims transferred on expiry of quota share agreement	-	33,788	-
Currency translation adjustment	(2,714)	22,668	29,969
Unpaid claims - end of year - net	1,762,932	1,662,551	1,463,280
Reinsurers' and other insurers' share of unpaid claims	176,431	181,660	225,945
Unpaid claims - end of year	\$ 1,939,363	\$ 1,844,211	\$ 1,689,225

The results for the years ended December 31, 2006, 2005 and 2004 were adversely affected by the evaluation of unpaid claims related to prior years. In 2004, unfavourable development on unpaid claims came primarily from Alberta non-standard automobile claims and long-haul trucking claims in the U.S. from terminated programs, in 2005, primarily from a terminated trucking program and Alberta non-standard automobile claims and in 2006, primarily from long-haul trucking claims in the U.S. and from allocated loss adjustment expenses on contractor property claims in the U.S.

Canadian Operations

The Canadian operations reported favourable reserve development of \$11.1 million in 2006 compared to unfavourable reserve development of \$2.1 million in 2005. Alberta and Ontario trucking business contributed \$2.1 million of prior years' claims development compared to \$4.7 million in 2005 and \$6.9 million in 2004. Alberta non-standard automobile contributed \$5.2 million of favourable development in 2006 compared to \$12.6 million and \$15.7 million of unfavourable development in 2005 and 2004, respectively.

U.S. Operations

The U.S. operations reported unfavourable reserve development of \$75.4 million in 2006 compared to \$22.2 million in 2005. We previously outsourced the claims settlement and case reserving process for the U.S. program business. Over the last few years we have made a concerted effort to bring most of these arrangements in-house and have significantly

increased our internal resources as part of this focused initiative. As part of these initiatives we have, over this period of time, completed a comprehensive review of all claim reserves previously handled by third parties. This review process identified several areas where the previous claims reserves were inadequate, resulting in unfavourable development of the prior years' claims reserves. Trucking business contributed \$59.4 million of the prior years' claims development in 2006, compared to \$29.5 million in 2005 and \$23.8 million in 2004. Property & liability business contributed \$13.5 million of the prior years' claims development in 2006, compared to \$17.4 million in 2005 and favourable development of \$7.1 million in 2004. Allocated loss adjustment expenses on contractor's claims in the property & liability segment contributed \$19.6 million in prior years' claims development. In 2006 which was offset by favourable development on other property business.

(c) Ranges of unpaid claims:

The Company's policy is, to the extent that management's estimates of gross reserve levels at our individual insurance subsidiaries are less than the point estimates recommended by their independent appointed actuary, those gross reserve levels will be increased to levels that are no less than the point estimate recommended by the independent appointed actuary. The ranges of provision for gross unpaid claims for our U.S. and Canadian operations estimated by our independent actuary and the actual carried provision for unpaid claims were as follows:

As of December 31, 2006	Low	High	Carried
U.S. Operations	\$ 990,991	\$ 1,274,850	\$ 1,138,407
Canadian Operations	684,189	915,267	800,956
Total	\$ 1,675,180	\$ 2,190,117	\$ 1,939,363

As of December 31, 2005	Low	High	Carried
U.S. Operations	\$ 992,920	\$ 1,211,515	\$ 1,084,843
Canadian Operations			759,368
Total			\$ 1,844,211

For 2005 in Canada, the independent appointed actuary developed a point estimate only in accordance with actuarial standards.

- (d) The fair value of unpaid claims and adjustment expenses, gross and recoverable from reinsurers, has been omitted because it is not practicable to determine fair value with sufficient reliability.

11. Acquisitions:

(a) Hamilton:

In 1999 the Company acquired all of the outstanding shares of Hamilton Investments, Inc. ("Hamilton"). All consideration was payable in cash, part of which was paid at closing, with the remaining payments based on the earnings of Hamilton for the fiscal years 1999 to 2003. The present value of the guaranteed future payments was accrued at the date of acquisition. The additional consideration paid during the year ended December 31, 2004 was \$2,013,750. No contingent consideration based on earnings was paid.

(b) Zephyr:

On October 31, 2005, the Company acquired 100% of the voting shares of HI Holdings Inc. for an estimated \$25,000,000, and preliminary goodwill of \$4,326,000. During 2006 the final purchase price was agreed with sellers at \$24,629,000, and goodwill of \$4,494,000 was determined for this acquisition.

The transaction includes HI's wholly owned subsidiary, Zephyr Insurance Company Inc. whose primary business is residential hurricane insurance. The earnings of HI Holdings have been included in the statement of operations from November 1, 2005.

Notes to Consolidated Financial Statements

(Tabular amounts in thousands of U.S. dollars, except for per share amounts)

HI Holdings, at the time of acquisition had total assets of approximately \$71,113,000 (excluding goodwill) consisting primarily of marketable securities and total liabilities of approximately \$51,541,000.

(c) Robert Plan Corporation ("RPC"):

In 2006, the Company entered into an agreement with The Robert Plan Corporation (RPC) whereby the Company acquired the renewal rights of RPC's assigned risk business. As part of these arrangements, RPC has been given the authority to market the assigned risk programs on behalf of the Company and the Company has assumed certain operating functions related to this business. RPC has also been granted an option for a limited period of time to repurchase these rights and acquire these operations functions from the Company. The Company recognized an intangible asset of \$20,600,000 relating to this acquisition and amortization of \$1,030,000 was recorded in 2006. The Company determined that the intangible asset has a definite life and will amortize it to income on a straight line basis over its defined useful life currently estimated at 10 years.

12. Segmented information:

The Company provides property and casualty insurance and other insurance related services in three reportable segments: Canada, the United States and corporate and other insurance related services. The Company's Canadian and United States segments include transactions with the Company's reinsurance subsidiaries. At the present time, other insurance related services are not significant. Results for the Company's operating segments are based on the Company's internal financial reporting systems and are consistent with those followed in the preparation of the consolidated financial statements.

The segmented information for December 31, 2006 is summarized below:

	Canada	United States	Corporate and other	Total
Gross premiums written	\$ 590,766	\$ 1,341,984	\$ -	\$ 1,932,750
Net premiums earned	562,444	1,204,053	-	1,766,497

Notes to Consolidated Financial Statements

(Tabular amounts in thousands of U.S. dollars, except for per share amounts)

13. Indebtedness:

(a) Bank indebtedness:

On March 5, 2004, the Company entered into a C\$150 million revolving credit facility with a syndicate of three banks. In December 2004 the facility was extended for a further 364 days and matured on March 3, 2006. The facility bore interest at a floating rate based on the type of loan and the Company's senior unsecured debt rating. The amount outstanding under this facility as at December 31, 2005 was \$11,178,000, with an effective interest rate of approximately 5%.

On February 15, 2006, the Company entered into a C\$150 million 364 day revolving credit facility with a syndicate of two banks that replaced the above facility. Depending on the type of loan, the facility bore interest at a floating rate based on the Company's senior unsecured debt rating. This facility was replaced on June 23, 2006.

On June 23, 2006, the Company entered into a new \$175 million 3 year revolving facility with a syndicate of three banks. This new facility replaced the above C\$150 million 364 day revolving credit facility and contains similar terms, conditions and financial covenants. The amounts outstanding under this facility as at December 31, 2006 were \$51,607,000 with an effective interest rate of 5.7%.

(b) Senior unsecured debentures:

On December 6, 2002, the Company issued C\$78 million of 8.25% unsecured senior debentures with a maturity date of December 31, 2007. The debentures are redeemable prior to the maturity date, at the Company's option, upon at least 30 days notice to debenture holders. Interest on the debentures is payable semi-annually in arrears. The net proceeds to the Company were C\$77,087,420. Interest payments were C\$6,435,000 for each of the last three years.

On January 29, 2004, a subsidiary of the Company, Kingsway America Inc., completed the sale of \$100 million 7.50% senior notes due 2014. The notes are fully and unconditionally guaranteed by the Company. The notes are redeemable at Kingsway America's option on or after February 1, 2009. In March 2004 an additional \$25 million of these senior notes were issued. Interest paid during the year was \$9,375,000, \$9,375,000 for 2005 and \$4,818,000 for 2004.

(c) Subordinated indebtedness:

Between December 4, 2002 and December 16, 2003, six subsidiary trusts of the Company issued \$90.5 million of 30 year capital securities to third parties in separate private transactions. In each instance, a corresponding floating rate junior subordinated deferrable interest debenture was then issued by Kingsway America Inc. to the trust in exchange for the proceeds from the private sale. The floating rate debentures bear interest at the rate of the London interbank offered interest rate for three month U.S. dollar deposits, plus spreads ranging from 3.85% to 4.20%, but until dates ranging from December 4, 2007 to January 8, 2009, the interest rates will not exceed 12.45% to 12.75%. The Company has the right to call each of these securities at par anytime after five years from their issuance until their maturity. The net proceeds to the Company were \$70,877,000 after deducting expenses of \$4,625,000. Interest paid during the year was \$8,479,000, \$6,702,000 for 2005 and \$4,947,000 for 2004.

(d) Loan payable:

On July 14, 2005 Kingsway Linked Return of Capital Trust ("KLROC Trust") completed its public offering of C\$78 million of 5.00% Kingsway Linked Return of Capital Preferred Units due June 30, 2015 of which the Company was a promoter. The net proceeds of the offering were used by KLROC Trust for a series of investments that included the purchase of a C\$74.1 million 7.12% senior note due June 30, 2015 issued by an affiliate.

Kingsway America Inc., a U.S. subsidiary has a promissory note payable balance of approximately \$66.2 million with Kingsway ROC LLC, an affiliated company. The note was issued on July 15, 2005 and bears interest at 7.37% annually. The note principal is payable on June 30, 2015. Interest paid during the year was \$4,881,000 and \$2,061,000 for 2005.

(e) Contractual obligations

The table below provides a breakdown of contractual obligations as described above in items (a) - (d) and note 15(f) as follows:

Payments Due by Period	2006	2005
Bank indebtedness	\$ 52,149	\$ 11,767
Construction contracts (note 15(f))	9,955	-
Senior unsecured debentures	191,930	192,068
Subordinated indebtedness	90,550	90,500
Loan payable	66,222	66,222
Total	\$ 410,446	\$ 360,557

14. Variable interest entities:

Variable interest entities include entities where the equity invested in the entity is considered insufficient to finance the entity's activities. The Company has two controlled entities which are variable interest entities and therefore not consolidated based on accounting standards as the Company is not considered to be the primary beneficiary. The Company accounts for its investment in these entities using the equity method and includes the investment in other assets of the Consolidated Balance Sheet. The Company's share of earnings in these entities is included in net investment income in the Consolidated Statement of Operations. As the funds invested in this non-consolidated affiliated entity formed part of the C\$74.1 million note referred to in note 13(d), the effect of this transaction is to show additional debt on the Company's financial statements and an off-setting equity investment of C\$8.3 million in the non-consolidated affiliated entity.

15. Commitments and contingent liabilities:

(a) Legal Proceedings:

In connection with its operations, the Company and its subsidiaries are, from time to time, named as defendants in actions for damages and costs allegedly sustained by the plaintiffs. While it is not possible to estimate the outcome of the various proceedings at this time, such actions have generally been resolved with minimal damages or expense in excess of amounts provided and the Company does not believe that it will incur any significant additional loss or expense in connection with such actions.

(b) Statutory Requirements:

Statutory policyholders' capital and surplus of the Company's insurance subsidiaries was \$1,070.7 million and \$977.5 million at December 31, 2006 and 2005, respectively.

The Company's subsidiaries are subject to certain requirements and restrictions under applicable state and provincial insurance legislation including minimum asset requirements and dividend restrictions. At December 31, 2006, under the various insurance regulatory restrictions, the Company's insurance and reinsurance subsidiaries have an aggregate dividend capacity of \$515.9 million (2005 - \$403.5 million).

(c) Letters of Credit:

On October 4, 2002 the Company entered into an annually renewable syndicated \$350 million letter of credit facility. The letter of credit facility is principally used to collateralize inter-company reinsurance balances for statutory capital management purposes. The Company pledges securities to collateralize the utilized portion of the letter of credit facility. At December 31, 2006 and 2005 the letter of credit facility utilization was \$272.3 million and \$227.3 million, respectively.

Also, from time to time, the Company pledges securities to third parties to collateralize liabilities incurred under its policies of insurance. At December 31, 2006 and 2005, the amount of pledged securities was \$25.8 million and \$39.4 million, respectively.

Notes to Consolidated Financial Statements

(Tabular amounts in thousands of U.S. dollars, except for per share amounts)

(d) Charitable donations:

In 2004 the Company agreed to make a gift contribution of C\$3 million to the Trillium Health Centre Foundation to be payable in equal instalments over the period of six years beginning in 2005. This contribution is being used to operate the Kingsway Financial Spine Centre in Mississauga, Ontario and is expensed as paid.

(e) Guarantee:

The Company provided a guarantee for the payment of principal and interest for a non-controlled affiliated entity which entered into a cross-currency swap transaction July 14, 2005 in conjunction with the Kingsway Linked Return of Capital Trust transaction described in note 13 (d) whereby the affiliate swapped fixed Canadian dollar payments for fixed U.S. dollar payments. The guarantee extends until the swap agreement terminates on June 30, 2015.

(f) Property:

In 2005, the Company acquired a real estate property to construct a new corporate head office. The cost of this project is estimated to be approximately C\$40 million. The outstanding commitments related to this project were \$9,595,000 at December 31, 2006.

16. Securitization Transaction:

During the year one of the Company's U.S. subsidiaries entered into a five year revolving securitization agreement to transfer its premium finance receivables to a third party Trust. The premium finance receivables are generally for a six month term corresponding to the underlying insurance policy issued by the U.S. subsidiary. The Company sold finance premium receivables of \$16.0 million to the Trust, recorded an associated retained interest in the discounted cash flows from the cash reserve deposit maintained with the Trust and established a liability for future servicing costs. The effect of this off-balance sheet arrangement is to remove the related premium finance receivable asset from the balance sheet.

17. Fair value disclosure:

The fair value of financial assets and liabilities, other than investments (note 3) and unpaid claims (note 10) approximate their carrying amounts.

18. Subsequent events:

(a) Sale of property:

On December 21, 2006, the Company signed an agreement for the sale of the existing head office building located at 5310 Explorer Drive, Mississauga, Ontario, in the amount of \$10,150,000, with a closing date of February 28, 2007.

(b) Business acquisition:

On January 24, 2007, the Company reached a definitive agreement to acquire Mendota Insurance Company, a wholly owned subsidiary of The St. Paul Travelers Companies. The transaction also includes Mendakota Insurance and Mendota Insurance Agency, Inc. wholly owned subsidiaries of Mendota Insurance Company. The acquisition is subject to regulatory approvals.

Mendota is non-standard automobile insurer headquartered in St. Paul, Minnesota, and licensed to write business in 43 states, through a network of approximately 6,000 independent agency locations.

19. Reconciliation of Canadian and United States Generally Accepted Accounting Principles:

The consolidated financial statements of the Company have been prepared in accordance with generally accepted accounting principles ("GAAP") in Canada. The significant differences between Canadian GAAP and U.S. GAAP, which affect the Company's consolidated financial statements, are described below:

The following table reconciles the consolidated net income as reported under Canadian GAAP with net income and other comprehensive income in accordance with U.S. GAAP:

	2006	2005	2004
Net income based on Canadian GAAP	\$ 123,309	\$ 135,008	\$ 101,014
Impact on net income of U.S. GAAP adjustments, net of tax:			
Deferred start-up costs (a)	-	-	671
Net income based on U.S. GAAP*	\$ 123,309	\$ 135,008	\$ 101,685
Other comprehensive income adjustments:			
Change in unrealized gain on investments classified as available for sale (b)	8,271	(43,131)	20,092
Change in fair value of interest rate swaps (c)	-	-	1,182
Less: related future income taxes	(1,194)	(6,165)	6,973
Other comprehensive income adjustments	9,465	(36,966)	14,301
Currency translation adjustments in the period (d)	(2,947)	8,238	8,467
Other comprehensive income (loss)	6,518	(28,728)	22,768
Total comprehensive income	\$ 129,827	\$ 106,280	\$ 124,453
*Basic earnings per share based on U.S. GAAP net income	\$ 2.19	\$ 2.39	\$ 1.81
*Diluted earnings per share based on U.S. GAAP net income	\$ 2.17	\$ 2.37	\$ 1.80

The following table reconciles shareholders' equity as reported under Canadian GAAP with shareholders' equity in accordance with U.S. GAAP:

	2006	2005
Shareholders' equity based on Canadian GAAP	\$ 900,962	\$ 804,715
Other comprehensive income	16,080	6,615
Cumulative net income impact:		
Other	(821)	(821)
Shareholders' equity based on U.S. GAAP	\$ 916,221	\$ 810,509

U.S. GAAP requires the Company to disclose items of other comprehensive income in a financial statement and to disclose accumulated balances of other comprehensive income or loss in the equity section of the Company's consolidated balance sheet. Comprehensive income, which incorporates net income, includes all changes in equity during a period, except those resulting from investments by, and distributions to, owners. There is currently no requirement to disclose comprehensive income under Canadian GAAP with respect to the presentation of comprehensive income. Effective January 1, 2007 Canadian GAAP will conform with U.S. GAAP. Total cumulative other comprehensive income amounted to \$23,091,000 and \$16,573,000 as at December 31, 2006 and 2005, respectively.

Notes to Consolidated Financial Statements

(Tabular amounts in thousands of U.S. dollars, except for per share amounts)

(a) Deferred start-up costs:

Under Canadian GAAP, start-up costs of Avalon Risk Management, Inc. are deferred and amortized over a five year period commencing from the date the start-up period ended. Under U.S. GAAP, such costs are expensed in the periods in which the expenditures are incurred. These costs were fully amortized as at December 31, 2004.

(b) Portfolio investments:

Under Canadian GAAP, portfolio investments are carried at cost or amortized cost, and where a decline in value of an investment is considered to be other than temporary, a write-down of the investment to its estimated recoverable amount is recorded. Under U.S. GAAP, such investments would be classified as available for sale and are marked to market after write-downs for other than temporary declines in values, and the unrealized gain or loss, net of any future income taxes, is recorded as other comprehensive income, a component of shareholders' equity.

(c) Accounting for Derivative Instruments and Hedging Activities:

U.S. GAAP requires all derivative instruments, including certain derivative instruments embedded in other contracts, to be recognized as either assets or liabilities in the balance sheet at their fair values, and changes in such fair values must be recognized immediately in earnings unless specific hedging criteria are met. The Company purchased interest rate swap contracts that were designated as cash flow hedges against the amounts borrowed under the unsecured credit facility. The interest rate swaps matured in March, 2004. The terms of the swaps matched those of the unsecured credit facility, and were entered into to minimize the Company's exposure to fluctuations in interest rates. The change in the fair value of interest rate swap contracts is reflected in other comprehensive income. Canadian GAAP will change on January 1, 2007 to conform with U.S. GAAP with respect to this item.

(d) Currency translation adjustments:

The Company reports its results in U.S. dollars. The operations of the Company's subsidiaries in the Canada, Bermuda and its head office operations are self-sustaining. These subsidiaries hold all of their assets and liabilities and report their results in Canadian dollars. As a result, the assets and liabilities of these subsidiaries are translated at the year end rates of exchange. The unrealized gains and losses, which result from translation are deferred and included in shareholders' equity under the caption "currency translation adjustment". The currency translation account will change with fluctuations in the Canadian to U.S. dollar exchange rate.

(e) Future accounting pronouncements:

In June 2006, the U.S. Financial Accounting Standards Board (FASB) issued FASB interpretation No. 48, Accounting for Uncertainty in Income Taxes which clarifies the accounting for uncertainty in income taxes recognized in an entity's financial statements. The Company will implement this standard effective January 1, 2007. The impact of this standard has not yet been determined.

20. Supplemental Condensed Consolidating Financial Information:

In 2004, Kingsway America Inc. (KAI) issued senior notes which are fully and unconditionally guaranteed by the Company. The following is condensed consolidating financial information for the Company as of December 31, 2006 and 2005 and for the three years ended December 31, 2006, 2005 and 2004, with a separate column for each of KAI as Issuer, the Company ("KFSI" as Guarantor and the other businesses of the Company combined (the "Non-Guarantor Subsidiaries"). For the purposes of the condensed consolidating financial information, the Company and KAI carry their investments under the equity method.

Condensed Consolidating Statement of Operations

For the year ended December 31, 2006

	KFSI		KAI		Other subsidiaries		Consolidation	Total		
	(the "Guarantor")		(the "Issuer")		(the "Non-Guarantor subsidiaries")		adjustments

Glossary of Selected Insurance Terms

A

Accident year

The annual accounting period in which loss events occurred, regardless of when the losses are actually reported, recorded or paid.

Agent

An intermediary appointed by an insurer to procure applications for insurance, receiving a commission from the insurer for policies written.

Allocated loss adjustment expenses (“ALAE”)

The expenses of settling claims that are charged to a particular file, including legal and other fees. The salary of the insurer’s claims adjuster is not included in “allocated loss adjustment expenses”. ALAE are also referred to as allocated claim expenses.

Assigned risks

“Assigned risks” are the drivers who cannot obtain insurance in the voluntary market and are placed by their broker/agent in the state’s assigned risk (or “residual”) pool. These applicants are then proportionately assigned to all auto insurers who do business in a given state.

Assume

To accept from the primary insurer or reinsurer all or a portion of the liability underwritten by such primary insurer or reinsurer.

Automobile liability insurance

Insurance which is primarily concerned with the losses related to bodily injury or property damage caused by an automobile and the resulting legal liability imposed on the insured.

B

Broker

An intermediary who negotiates policies of insurance with insurers on behalf of the insured, receiving a commission from the insurer for placement and other services rendered.

Buy-out fee

The fee received by a company for accepting another company’s assignments from assigned risk plans. The buy-out fee is based on a percentage of the premium that is expected to be written by accepting the assignments.

C

Case reserves

The liability established to reflect the estimated cost of reported but unpaid claims and claims expenses that the insurer will ultimately be required to pay.

Casualty insurance

Generally used to describe an area of insurance not particularly or directly concerned with life insurance or property insurance. It is insurance which is primarily concerned with the losses caused by injuries to third persons (in other words, persons other than the policyholder) and the resulting legal liability imposed on the insured.

Catastrophe reinsurance

A form of non-proportional excess of loss reinsurance that, subject to a specified limit, indemnifies the ceding company for the amount of loss in excess of a specified retention with respect to an accumulation of losses resulting from a covered catastrophe, such as a hurricane or hailstorm.

Cede; cedant; ceding company

When a party reinsures its liability with another, it “cedes” business and is referred to as the “cedant” or “ceding company”.

Claim

The amount demanded under a policy of insurance or reinsurance arising from the loss relating to an insured event. A claim is also referred to as a loss.

Claim expenses

The expenses of settling claims, including legal and other fees and the portion of general expenses allocated to claim settlement costs. Claim expenses are also referred to as loss adjustment expenses.

Claim reserves

The total case reserves and IBNR (see IBNR reserve).

Claims incurred

The aggregate of all claims and claim expenses paid during an accounting period adjusted by the change in reserve for claims and claim expenses for that accounting period. Claims incurred are also referred to as losses incurred.

Claims ratio

Claims incurred, net of reinsurance, expressed as a percentage of net premiums earned. Claims ratio is also referred to as loss ratio.

Combined ratio

A combination of the claims ratio and the expense ratio, determined in accordance with either statutory accounting principles (SAP) or Canadian GAAP. A combined ratio below 100% generally indicates profitable underwriting prior to the consideration of investment income. A combined ratio over 100% generally indicates unprofitable underwriting prior to the consideration of investment income.

Compound annual growth rate (“CAGR”)

The year-over-year growth rate of an investment over a specified period of time.

E

Excess of loss reinsurance

A form of non-proportional reinsurance that covers a loss of the reinsured on a single "risk" in excess of its retention level of the type reinsured, rather than to aggregate losses for all covered risks, as does catastrophe excess of loss reinsurance. A "risk" in this context might mean the insurance coverage on one building or a group of buildings or the insurance coverage under a single policy, which the reinsured treats as a single risk.

Expense ratio

The commission expense, premium tax expense and all general and administrative expenses incurred in operating the business expressed as a percentage of net premiums earned.

F

Facility association

A mandatory pooling arrangement among all industry participants that provides automobile insurance coverage to individuals or businesses that are otherwise unable to purchase that coverage from private insurers.

G

General liability insurance

Insurance which is primarily concerned with losses caused by negligent acts and/or omissions resulting in bodily injury and/or property damage on the premises of a business; injury resulting from the use of a product manufactured or distributed by a business, or injury occurring in the general operation of a business.

Gross premiums written or gross premiums

The total premiums, net of credits and cancellations, on insurance underwritten by an insurer or reinsurer during a specified period, before deduction of reinsurance premiums ceded.

I

IBNR reserve

Reserves for estimated claims that have been incurred by insureds but not yet reported to the insurer including unknown future developments on claims which are known to the insurer.

Independent agent or independent producer

A person or firm who produces applications for insurance for an insurer either directly or through a program manager, but is not an employee of and is not otherwise legally affiliated with the company or the program manager, except to the extent of the agency contract.

L

Liability insurance

Insurance which serves to protect the insured from the financial consequences of damages claimed by third parties.

Loss adjustment expenses ("LAE")

The expenses of settling claims, including allocated loss adjustment expenses and unallocated loss adjustment expenses. LAE are also referred to as claim expenses.

Loss Ratio

See "Claims ratio".

M

Minimum Capital Test ("MCT")

A financial ratio calculated by the Office of the Superintendent of Financial Institutions to assist in monitoring the financial condition of property and casualty insurance companies.

N

Net premiums earned

The net premiums written of an insurer relating to that portion of the term of its insurance policies which fall within a given year or other specified period.

Net premiums written or net premiums

The total gross premiums written by an insurer for a given year or other specified period less premiums ceded to reinsurers during such period.

Non-standard automobile insurance

Insurance provided to individuals who do not qualify for standard automobile insurance coverage because of their payment history, driving record, place of residence, age, vehicle type or other factors, including market conditions.

P

Premium tax

A tax paid by insurance companies to state or provincial governments calculated as a percentage of gross premiums written.

Producer

A broker or agent from whom an insurer receives applications for insurance coverages.

Program manager

A person or firm authorized by an insurer to transact insurance business who may have authority to bind the insurer, issue policies, appoint producers, adjust claims and provide administrative support for the types of insurance coverage pursuant to an agency agreement.

Property insurance

Insurance which provides coverage to a person with an insurable interest in tangible property for that person's property loss, damage or loss of use.

Provision for unpaid claims

Provisions or reserves established by insurers and reinsurers to reflect the estimated cost of claims payments and the related expenses that the insurer or reinsurer will ultimately be required to pay in respect of insurance or reinsurance it has written. Provisions are established for claims and for claim adjustment expenses. Provisions for unpaid claims are also referred to as claim or loss reserves.

Q

Quota share reinsurance

Form of proportional reinsurance in which a defined percentage of all risks held by the insurer in a specific line of business is reinsured.

R

Risk based capital ("RBC")

A formula adopted by the U.S. National Association of Insurance Commissioners to assist state insurance regulators to monitor the financial status of a property and casualty insurer. The formula specifies minimum capital and surplus levels to be maintained by the insurer based on the nature of the business it underwrites and its investments.

Redundancy (deficiency)

Claims reserves are re-evaluated at different points in time. An increase from the initial estimate indicates a deficiency and a decrease indicates a redundancy.

Reinsurance

An arrangement in which an insurance company, the reinsurer, agrees to indemnify another insurance or reinsurance company, the ceding company, against all or a portion of the insurance or reinsurance risk underwritten by the ceding company under one or more policies.

Reserve development

Losses for which estimations of ultimate incurred losses and allocated loss adjustment expenses are proven inadequate or excessive. Increases or decreases in incurred losses as a result of reserve development are recognized in financial statements in the period of change. Favourable development (reserve redundancy) means that the original claim estimates were higher than subsequently determined. Unfavourable development (reserve deficiency) means that the original claim estimates were lower than subsequently determined.

S

Salvage

The amount of money an insurer recovers through the sale of property transferred to the insurer as a result of a loss payment.

Statutory accounting principles ("SAP")

Recording transactions and preparing financial statements in accordance with the rules and procedures prescribed or permitted by insurance regulatory authorities including the NAIC, which in general reflect a liquidating, rather than going concern, concept of accounting.

Surplus as regards to policyholders

The amount remaining after all liabilities, including loss reserves, are subtracted from all "admitted assets" as determined in accordance with SAP. Admitted assets of an insurer are assets permitted under SAP to be taken into account in determining the insurer's financial condition for statutory purposes. Surplus as regards to policyholders is also referred to as statutory surplus.

T

Tail

The period of time that elapses between either the writing of the applicable insurance policy or the loss event (or the insurer's knowledge of the loss event) and the payment in respect thereof. A "short-tail" product is one where ultimate losses are known comparatively quickly; ultimate losses under a "long-tail" product are sometimes not known for many years.

Treaty reinsurance

The reinsurance of a specified type or category of risks defined in a reinsurance agreement (a "treaty") between a primary insurer or other reinsured and a reinsurer. Typically, in treaty reinsurance, the primary insurer or reinsured is obligated to offer, and the reinsurer is obligated to accept, a specified portion of all such type or category of risks originally written by the primary insurer or reinsured.

U

Unallocated loss adjustment expenses ("ULAE")

The expenses of settling claims that are not directly related to any one particular claim, including salaries and other overhead costs of the insurer's claims department. ULAE are also referred to as unallocated claim expenses.

Underwriting

The insurer's or reinsurer's process of reviewing applications submitted for insurance coverage, deciding whether to insure all or part of the coverage requested and determining the applicable premiums.

Underwriting capacity

The maximum amount that an insurance company can underwrite. The limit is generally determined by the company's retained earnings and investment capital. Reinsurance serves to increase a company's underwriting capacity by reducing its exposure from particular risks.

Underwriting expenses

The aggregate of policy acquisition costs, including commissions, and the portion of administrative, general and other expenses attributable to underwriting operations.

Underwriting profit

The difference between net premiums earned and the sum of claim expenses and underwriting expenses. Because underwriting profit excludes investment income, it is a commonly used method of evaluating the performance of a property and casualty insurance company.

Unearned premiums

The net premiums written by an insurer relating to the period of time of its insurance policies that fall within subsequent periods and that are deferred to such subsequent periods.
